[2] Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering is not a measurement of higher performance. [3] Full high-definition content is required to view (FHD) images. [4] USB Type-C™ and USB-C™ are trademarks of USB Implementers Forum. [17] Unlimited access to Universal Music's portfolio for 12 months, free to HP customers. Internet access is required. [5] Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See http://www.microsoft.com. [6] Full high-definition (FHD) content is required to view FHD images. [7] Performance is sequentially faster (read-only) compared to traditional HDD.
