

HP Z200 Workstation

Low-cost, high-performance mainstream entry workstation

Power hungry? Do you need a workstation-class system but have a PC budget? Boasting advanced memory, graphics and storage plus application certification, next-generation processors, HP SkyRoom and HP Performance Advisor, the HP Z200 Workstation brings workstation-class productivity to the masses.

HP recommends Windows® 7.

Innovation that transforms the way you work

The HP Z200 creates a new entry-point into the HP Workstation family, offering the advanced power and productivity of workstation technology at starting prices that rival traditional desktop computing systems.

Experience easy access—both inside and out with a tool-free chassis and convenient FireWire® and USB ports on the front.

Choose from a breadth of graphics selections—including HP integrated graphics or 2D/3D options from NVIDIA and ATI.

Performance to help you accomplish more every minute

The HP Z200 is engineered to optimize the way the processor, memory, graphics, operating systems and software work together.

Get fast performance—with built-in memory controller and your choice of future Intel® Core™ dual-core processors or Intel Xeon® quad-core processors ^{1, 2, 3}.

Fine-tune your workstation's performance— and maintain your drivers, operating systems and applications with HP Performance Advisor.

Be future-ready—with expanded PCIe, FireWire, a whopping 11 USB interfaces and plus a range of SATA, eSATA and storage bays, optional 22-in-1 media card reader and optional Blu-Ray writer ⁴.

Save energy—with ENERGY STAR® 5.0 qualification, 89% efficient power supplies and HP WattSaver technology, which, when activated, consumes less than 1 watt in off mode.

Reliable, legendary, confidence-inspiring quality

Deliver results and stay productively up and running with a confidence backed by in-depth engineering, testing and quality assurance.

Reliable enterprise-class technology at an entrylevel price—includes ECC memory that helps ensure data integrity and higher system uptime.

Close ISV relationships—help ensure that HP Workstations are fully certified and optimized for your applications.

Maintain image stability—streamline certification processes and migrate smoothly with a years-long lifecycle.

Choose, use, protect, and transition with ease—with HP Total Care's personal attention, convenient tools and reliable services.

¹ Dual-Core and Quad-Core technologies are designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefits. Not all customers or software applications will necessarily benefit from use of these technologies.

² 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See <http://www.intel.com/info/em64t> for more information.

³ Intel's numbering is not a measurement of higher performance.

⁴ Actual speeds may vary. Does not permit copying of commercially available DVD movies or other copyright protected materials. Intended for creation and storage of your original material and other lawful uses. Double Layer discs can store more data than single layer discs. However, double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. As Blu-ray is a new format containing new technologies, certain disc, digital connection, compatibility and/or performance issues may arise and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. In order for some Blu-ray titles to play, they may require a DVI or HDMI digital connection and your display may require HDCP support. HD DVD movies cannot be played on this Desktop PC.
