

Safeguard government funds, protect constituent resources

HP Tamper-evident Printing Solution for US Women, Infants & Children (WIC) Programs

What if you could...

- Increase the security of printed voucher checks with tamper evident toners?
- Reduce the cost of voucher and check paper while increasing security features?
- Deploy a solution which is fully supported by HP under warranty and service agreement?
- Reduce the costs and errors associated with altered vouchers and checks?
- Confidently meet security and compliance requirements?

Protect against fraudulent WIC voucher alteration

The temptation to alter vouchers and checks increases as parents and families struggle to meet their basic needs. In that environment, WIC vouchers and checks become likely targets for attempts to modify available amounts and payees. The goals of state WIC Directors include enhancing participant services, easily adapting to new federal food packages, and improving the efficiency and security of the WIC voucher issuance process. Understanding that there are limited funds available through the agencies and a growing need to meet the nutrition needs of children in underprivileged homes, eliminating fraud and system abuse is critical to meeting the goals of the WIC agencies.

HP Solution at a glance

HP Tamper-evident Printing Solution for US Women, Infants & Children (WIC) Programs uses a special toner to help protect WIC vouchers against chemical alteration. The special toner formula forces a bright red stain to appear if chemical alteration is attempted. Any solvent that will remove the toner will release the red stain. The range of

toner options allow WIC Directors to select the printer, software, and supplies which meet their optimal operational, security, and budgetary requirements.

Integration services help eliminate the cost of host software changes during implementation. Laser printed "blank" WIC paper can be half the cost of pre-printed encoded WIC forms, which can deliver an attractive ROI. WIC Directors can also enhance security and control use via secure trays to reduce the risk of WIC voucher theft. And MICR toner sensing can prohibit the printing of checks and vouchers without the use of MICR toner. Password-protected security fonts, MICR fonts and custom signatures can also help prevent counterfeiting.

HP Tamper-evident Printing Solutions for WIC are customizable and scalable to meet secure voucher and check printing requirements. HP's strong partner ecosystem means HP has safeguarded (enhanced, improved or advanced) the check printing system for quality and reliability.

HP Tamper-evident Printing Solution for US Women, Infants & Children (WIC) Programs

Safeguard government funds and protect constituent resources with fraud prevention

Confirm eligibility and qualify applicants

Print vouchers and checks with security features

Why HP?

HP is a trusted partner to hundreds of government agencies in countries all around the world. This experience gives us unique insight into clients' concerns around security, cost reduction and reliability. Partner with HP to streamline the flow of documents and information that drive your agency. Partner with HP to streamline the flow of documents and information that drive your agency.

Complete solutions

With end-to-end solutions and services, HP works with you to identify and address your specific needs today and into the future.

Unsurpassed expertise

HP domain expertise and experience enables us to deliver technology-led solutions that address specific industry challenges.

Global reach

With IT professionals in 170 countries, HP has the resources to address your organization's needs here, and around the world.

Industry leadership

HP is recognized as a global leader in imaging, printing, and computing, an industry leader in print security, network and infrastructure management, and an organization with a strong commitment to environmental sustainability.

How do you get started?

Contact your local HP representative to:

- Set up a workshop to assess your specific needs.
- Establish a plan to implement the best solution for today and into the future.
- Identify an approach that can help you save time, resources, and money.
