

Increase compliance, improve security

HP Document Capture Solution for Evidence of Identity

What if you could...

- Store citizen identity documents securely and integrate the process into your agency's workflow?
- Index and capture metadata, aggregate documents and tag transactions with enhanced security features?
- Achieve current and future national and international compliance?
- Audit the process of document scanning, storage, access and retrieval?

Augment workflows to meet state, provincial and federal citizen identity requirements

Countries in every region of the globe are implementing increasingly sophisticated requirements to document each citizen's identity. European Union regulations, for example, aim to standardize passports and travel documents as well as digital signatures. The REAL ID Act in the U.S. requires government agencies to capture accurate evidence of identity documents presented for driver licenses and state identity cards to protect national and international security. There are many more examples the world over where automation and standardization can help agencies meet requirements more efficiently and effectively.

HP solution at a glance

HP Document Capture Solution for Evidence of Identity helps government agencies support the requirements of citizen identity documents. It works by fully integrating into your current workflow process to capture and store each citizen's documentation while tagging the documents in identity-related

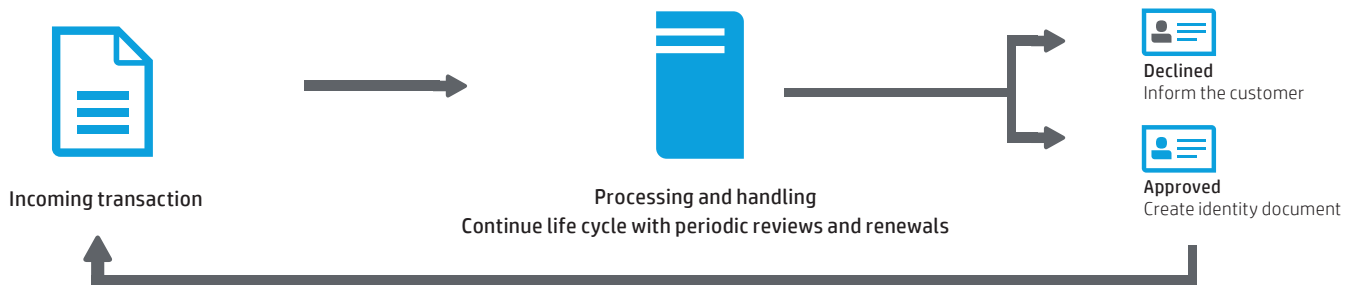

transactions. The complete solution can be tailored to integrate with new or existing enrollment applications. Consider capturing evidence of identity for human resources, security policy implementations, professional licensing or even membership enrollment. The solution includes the following features:

- Software that integrates into your enrollment application to help manage the process of capturing paper and identification documents and storing images.
- Device integration for HP multifunction printers (MFPs) that allows users to select specific scanning workflows for each capture scenario and each customer.

HP Document Capture Solution for Evidence of Identity takes advantage of today's leading imaging and indexing technologies, yet is flexible enough to integrate into existing workflows. So, when governments demand more rigorous standards, you'll be ready.

HP Document Capture Solution for Evidence of Identity

Increase compliance and improve security by managing 'breeder' and 'foundation' documents more securely

Breeder document examples

- A valid unexpired passport
- A certified copy of a birth certificate
- A consular report of birth abroad
- An unexpired permanent resident card
- An unexpired employment authorization document
- An unexpired foreign passport with valid visa affixed
- A certificate of citizenship
- A certificate of naturalization
- A national identity card

Why HP?

HP is a trusted partner to hundreds of government agencies in countries all around the world. This experience gives us unique insight into clients' concerns around security, cost reduction and reliability. Partner with HP to streamline and protect the flow of documents and information that drive your agency. You can count on:

Complete solutions

With end-to-end solutions and services, HP works with you to identify and address your specific needs today and into the future.

Unsurpassed expertise

HP domain expertise and experience enables us to deliver technology-led solutions that address specific industry challenges.

Global reach

With IT professionals in 170 countries, HP has the resources to address your organization's needs here, and around the world.

Industry leadership

HP is recognized as a global leader in imaging, printing, and computing, an industry leader in print security, network and infrastructure management, and an organization with a strong commitment to environmental sustainability.

How do you get started?

Contact your local HP representative to:

- Set up a workshop to assess your specific needs.
- Establish a plan to implement the best solution for today and into the future.
- Identify an approach that can help you save time, resources, and money.
