

# Comply with mandates, automate workflows

## HP Redaction Solution for Government

### What if you could...

- Increase the short- and long-term security and privacy of the documents in your care?
- Automate the redaction process of sensitive documents?
- Strengthen control over capture and redaction processes, while reducing errors and lost documents?
- Distribute the costs of document capture, management, and workflow more evenly throughout your organization?

### Increase control of privacy and compliance in your document workflows

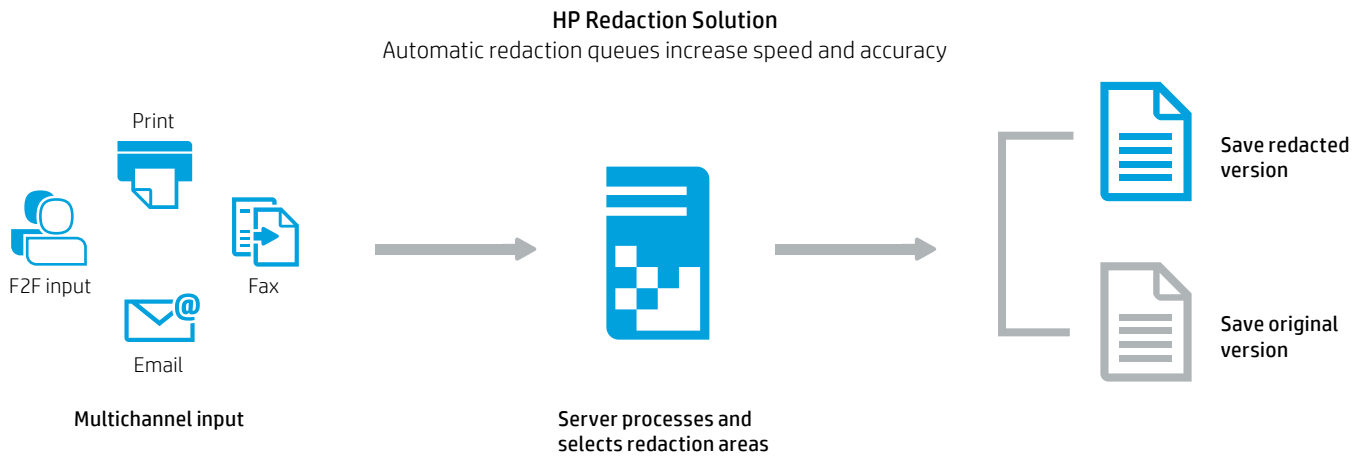

Tightening budgets and cuts in funding mean doing more with less. Automating processes drives efficiencies so that the time, productivity, and financial costs of the outdated, manual pen-and-paper method will no longer hinder compliance with essential mandates and security requirements.

Enterprise document management, imaging, and workflow solutions expand the functionality of HP multifunction printers (MFPs) and scanners. Now, you can scan and index documents from an HP MFP directly to your business workflow processes—including redaction queues.

### HP solution at a glance

HP Redaction Solution delivers document capture, imaging, and workflow solutions that enable customers to initiate and streamline secure workflow processes directly from an HP MFP or scanner. Users can capture, index, and route documents using intuitive workflow options accessed directly from the device's touchscreen. This redaction solution addresses the challenge of complying with privacy mandates by replacing manual, time-consuming processes with lower-cost and higher-productivity automation. With the HP Redaction Solution, you can:

- Remove sensitive or private information from documents.
- Reduce costs, time, and errors by automating redaction processes.
- Strengthen security and improve compliance with legal requirements.
- Capture documents on HP MFPs and scanners at the source without additional hardware.
- Improve constituent satisfaction.
- Integrate with enterprise resource planning (ERP) and business applications.

## Why HP?

For more than 50 years, HP has partnered with hundreds of government agencies in countries all around the world, supplying the technical expertise required to better serve their constituents. We've been recognized for our leadership in managed print services by independent analysts such as Gartner,<sup>1</sup> IDC,<sup>2</sup> Quocirca.<sup>3</sup> This experience gives us unique insight into clients' needs to reduce costs, drive productivity, and improve your constituents' experience.

We will take the time to understand your specific needs and create a plan to help optimize your fleet, ensure data and document security, and manage your evolving organization.

## Get started

Contact your local HP representative to:

- Set up a workshop to assess your specific needs.
- Establish a plan to implement the best solution for today and into the future.
- Identify an environmental approach that can help your organization save money.
