

Automate document processing, accelerate case resolution

HP Courts Case Processing Accelerator

What if you could...

- Minimize the manual paper handling required to capture, store, and distribute case documentation?
- Speed judicial case processing and enable your court to handle more cases?
- Reduce paper waste associated with the multiple photocopies of case documentation?
- Share scanned documentation faster and easier with other government agencies and parties?
- Secure sensitive court case documentation?
- Mitigate the risk of lost or misfiled case documentation?
- Gain efficiency in other paper-based processes, such as invoice processing and job applications?

Document processing in a digital world

Courts around the world are facing challenges related to case documentation. Aside from the inevitable growing case load and associated paperwork, courts are being asked to provide more judicial information access while simultaneously ensuring its security, contain paper document archiving space, reduce operational costs, and speed case adjudication.

Some courts have started initiatives (electronic filing, for example) aimed at reducing the amount of paper they handle and process. However, documents such as direct complaints, indictments, subpoenas, and warrants cannot always be filed electronically.

That's why it's vital that courts consider a digital document capture system, such as HP Courts Case Processing Accelerator, to handle incoming judicial documentation that continues to arrive in a paper format. It's designed specifically for the advanced capture and routing of court case documentation into courts' IT systems, such as document management and case management systems.

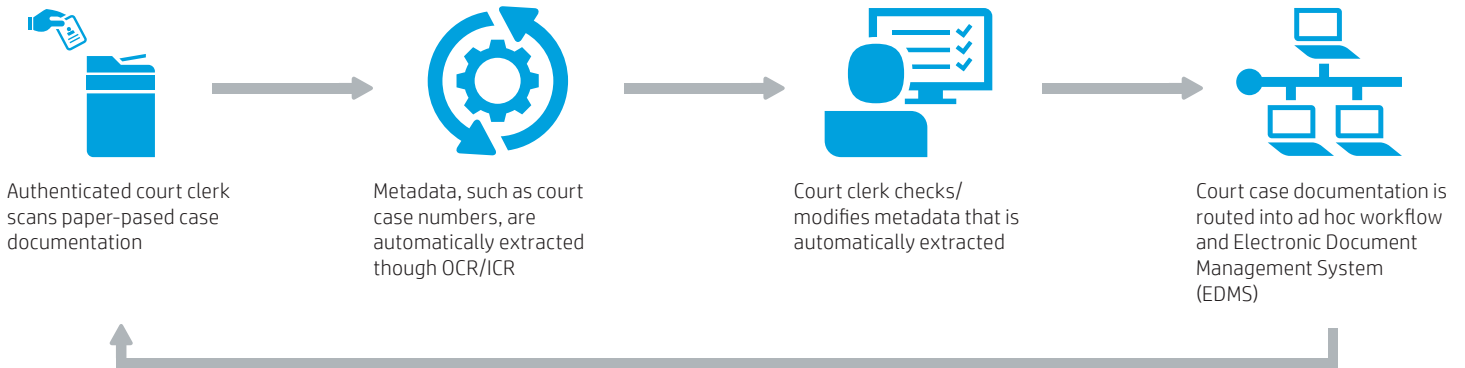

HP solution at a glance

HP Courts Case Processing Accelerator frees up court clerks and court officers from the intensive, manual process of sorting, copying, distributing, and filing documents in hard-copy or electronic form. User authentication with enhanced security takes place directly from the HP multifunction printers (MFPs) and scanners. Handwritten papers, typed documents, forms, and photos are immediately sent to a scanning, indexing, and routing engine for automatic, customized workflow distribution and archiving. The solution also allows judges, lawyers, and caseworkers to collaborate more effectively—receiving, accessing, and printing documents on demand.

HP Courts Case Processing Accelerator is an IT enhancement that significantly impacts court budgets, employee productivity, and citizen satisfaction.

It is customizable and scalable to a multitude of requirements. And the strong HP partner ecosystem means HP can draw from a wide range of compatible third-party providers to tailor your solution even further.

HP Courts Case Processing Accelerator

When compared to manual processing, the benefits are evident:

- Speed case preparation by intelligently capturing and routing case documentation right from HP MFPs and scanners—enabling court officers to access case documentation faster.
- Decrease indexing error rates by providing intelligent indexing support to caseworkers.
- Lower printing waste with on-demand printing of court documents.
- Reduce operational costs due to lower paper handling requirements.
- Reduce processing errors with the automated data extraction.
- Increase security with authentication capabilities at MFPs and easier-to-secure electronic documentation.

Why HP?

For more than 50 years, HP has partnered with hundreds of government agencies in countries all around the world, supplying the technical expertise required to better serve their constituents. We've been recognized for our leadership in managed print services by independent analysts such as Gartner,¹ IDC,² Quocirca.³ This experience gives us unique insight into clients' needs to reduce costs, drive productivity, and improve your constituents' experience.

We will take the time to understand your specific needs and create a plan to help optimize your fleet, ensure data and document security, and manage your evolving organization.

Get started

Contact your local HP representative to:

- Set up a workshop with HP to assess your specific business needs.
- Establish a plan to implement the best solution for today and into the future.
- Identify an environmental approach that can help your organization save money.
