

# HP Labeled Media and Automation Bar Code Labels

One of the most important components of any automated tape backup solution is the label on the cartridge itself. That is why HP offers a range of custom labeled, RFID and non-custom labeled data cartridges that have been tested to extremes for maximum reliability and performance.

## Key features and benefits

- Support for LTO Ultrium - LTO-3, LTO-4, LTO-5 and LTO-6.
- All HP bar code labels are tested to extremes, using proprietary software, to provide maximum reliability and performance.
- No additional charge for bar code labeled media compared to unlabeled media<sup>1</sup>.
- With HP No Case Library Pack labeled media, you just load the cartridge into the library: no superfluous packaging, no time wasted.
- Labels are applied professionally in a clean and controlled environment to prevent backup disruptions – poor quality labels or labels not properly applied will risk data loss.
- RFID tags conform to EPC Radio-Frequency Identity Protocols Class-1 Generation-2 UHF RFID and ETSI EN 302 208-1 (v1.2.1 or later).

### HP LTO Ultrium Custom Labeled Data Cartridges

- HP LTO Ultrium custom labeled data cartridges save time and money. Custom labeled media can be ordered with fully tailored label sequences.
- HP tests its bar code labels. No media-only supplier can match HP's experience and knowledge of high performance tape libraries.
- Easy-to-use online label specification process to eliminate errors in the ordering process: go to [hpsm.us](http://hpsm.us)
- The environmental impact of packaging is greatly reduced by purchasing HP LTO media in secure and reliable No Case Library Packs.

### HP LTO Ultrium Non-Custom Labeled Data Cartridges

- HP LTO Ultrium non-custom labeled data cartridges are available off the shelf for all HP LTO Ultrium media.
- Bar code sequences predetermined by HP and are in consecutive sequence eg 1 to 20.
- Five free cleaning cartridge labels with every 20 non-custom labeled data cartridges.

<sup>1</sup> At the time of writing there is a \$1 (or equivalent) charge for RFID labeling only.
