

# Secure, simplify, and save

HP Prescription Printing Security Solution adds security print features for healthcare providers

## What if you could...

- Save your organization time and money by printing high-value documents on plain paper or by adding new security features to pre-printed security stock paper?
- Protect your organization from loss, censure, or liability by adding proven fraud prevention features to your documents?
- Print high-value documents with security features at a single location, or anywhere on the network, using HP enterprise-class LaserJet and PageWide printing devices?

## Solution at a glance

The HP Prescription Printing Security Solution enables you to use your HP enterprise-class LaserJet and PageWide printers and multifunction printers (MFPs)—and plain paper—to print high-value, black-and-white documents with anti-fraud security features. Or you can add proven security features to your documents printed on security forms paper. The server-based application lets you define settings for security printing queues, adding anti-fraud features to print files before they are routed to the printer:

**Copy-evident pantograph**—reveals a special pattern when any unauthorized copying or scanning occurs.

**Variable data watermark**—prints unique user-defined data across the back of each document to protect against alteration.

**MicroPrint optimized**—reveals secondary authentication under simple magnification.

**Intelligent warning box**—allows first line inspectors to easily verify document authenticity.

HP Prescription Printing Security Solution can provide important operational benefits that save time and money:

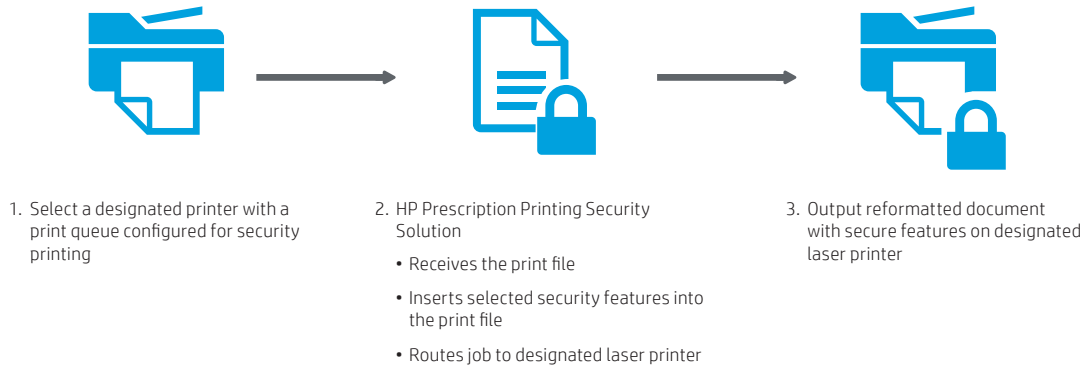

**Flexible server-based deployment**—enables installation on existing networks with HP LaserJet and PageWide printers connected.

**Plain paper printing**—reduces or eliminates dependency on expensive pre-printed security stock paper and the associated time spent on chain-of-custody management.

**Workflow simplification**—streamlines the entire security document print process, and eliminates the need for locking paper trays or dedicated security printers, and the added management time.

**Certified by HP**—provides confidence in the quality and ease of implementation of the solution.

## Server-based, on-demand security printing with the HP Prescription Printing Security Solution

### HP at work around the world

A major Southeastern U.S. healthcare system needed to securely issue prescriptions directly from its two electronic medical record (EMR) systems: one for its hospitals and another for its clinics. Secure printing across the entire printer network was vital to reduce the risk of fraud and meet stringent government regulations. It needed to print prescriptions on existing devices spread throughout multiple facilities. In addition, its clinic management selected small footprint laser printers because of space constraints.

The HP Prescription Printing Security Solution was selected to meet this challenge. The unique flexibility of this software application allowed the IT staff to easily configure the desired print queues for secure prescription printing. Now the organization can print government-compliant prescriptions at any printer on the network, avoid unnecessary costs or complex logistics, and stay in compliance.

### Why HP?

For more than 50 years, HP has been partnering with leading healthcare organizations, supplying the technical expertise and business savvy required to position these companies at the forefront of healthcare innovation. Today, industry analysts rank HP as a leading provider of information technology and services to the health and life sciences industry. In fact, nearly half of the top 10 healthcare equipment and services companies are HP Managed Print Services clients.<sup>1</sup>

HP's patient-centered healthcare solutions enable providers and empower patients with more powerful and intuitive solutions that deliver better care. We can help you improve care delivery, patient engagement, and population health management.

We will take the time to understand your specific needs and create a plan to help optimize your fleet, ensure data and document security, and manage your evolving workplace.

### Get started

Contact your local HP representative to:

- Set up a workshop to assess your specific business needs.
- Establish a plan to implement the best solution for today and into the future.
- Identify an environmental approach that can help your organization save money.
