

HP LTO Eco Packs

Make a big impression on storage efficiency and a small one on the environment. HP LTO Ultrium Eco Pack Media ships in library packs of 20 cartridges to speed up tape loading, while cutting your environmental impact. Eco Packs are environmentally cheaper to produce than individual plastic cases, but give just as much protection for your data, and faster loading by removing the need for individual cartridge cases.

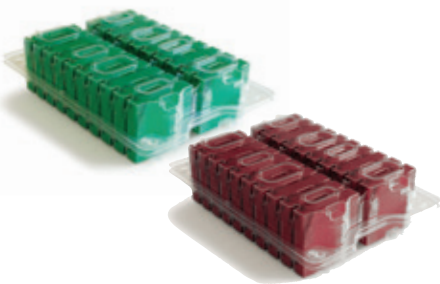

Key features and benefits

Fast, efficient and convenient

- HP LTO Ultrium tapes come in a bulk library pack without the packaging that you would normally have to throw away.
- Strong and environmentally friendly.
- Reduces the material and energy footprint of traditional storage media packaging.
- Eco Packs are configured for transportation and safety to meet HP's rigorous shock and vibration requirements.
- Custom-labelling service available free of charge.
- Simple and precise online bar code sequencing tool at www.hpstoragemedia.com/plm
- Custom Labelled Eco Packs feature precisely engineered and aligned Tri Optic TTG™ barcodes.
- HP has designed and measured the new packaging format to pass intensive tests that replicate day-to-day movement of tapes on and off site. The stackable Eco Packs provide safe protection for the data cartridges when not in use.

Your data is just as safe in an Eco Pack as it is in 20 separate plastic cases

- The performance and reliability of the Eco Pack is tested to extremes in HP's media laboratory, to a level of specification unique to Hewlett-Packard.
- Both cartridge and label are tested for maximum reliability in demanding automation environments.
- The Eco Pack does not compromise protection from shock, vibration and debris contamination when compared to existing polypropylene packaging.

It's more than just a big box

You'll never put your data at risk by using an Eco Pack to store and archive your data cartridges. It's tough enough to safeguard your storage media as well as any plastic cases, for as long as you want.

But, unlike plastic cases, it saves time loading your library and is softer on the environment, using less energy to produce and cutting carbon emissions.
