

HP Elite 7300 Microtower PC

Upgrade to amazing

The HP Elite 7300 Microtower business PC is completely redesigned to fit the most discerning style, with added performance and expandability; it's everything your business needs including HP exclusive Beats Audio™. So, go ahead, upgrade to amazing.

HP recommends Windows® 7.

State-of-the art computing

Your needs can change at the click of a mouse. You need a PC that can keep up. The HP Elite 7300 features the 2nd Generation Intel® Core™ chipset to do the heavy lifting, so you can focus on your business.

The choice is yours

Equip your business with 2nd Generation Intel® Core™ i3, Core™ i5 or Core™ i7 processors¹ for speed and multiple cores working together for you. You choose a hard drive up to 2TB².

Unlock the sound

HP exclusive Beats Audio™ is optimized for studio-quality sound through the digital headphone jack. You'll hear the music the way the musicians and producers intended.

More flexibility when you need it

Add storage when your business demands it. And customize your PC with optional features like the Super Multi DVD Writer³ drive and integrated 15-in-1 media card reader which let you transfer and backup files.

Protect your business

HP ProtectTools⁴ for Small Business (optional) provides multiple security modules—just use the ones that you need.

HP Elite 7300 Microtower PC

HP recommends Windows® 7.

¹ 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information. Multi Core is designed to improve performance of certain software products. Not all customers will necessarily benefit from the use of this technology. Intel's numbering is not a measurement of higher performance.

² For hard drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 10 GB and up to 16 GB of disk space is reserved for the system recovery software.

³ Don't copy copyright-protected materials. Actual speeds may vary. Double Layer discs can store more data than single layer discs; discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided – Version 1.0 media.

⁴ HP ProtectTools requires Microsoft Windows.
