Print where healthcare happens
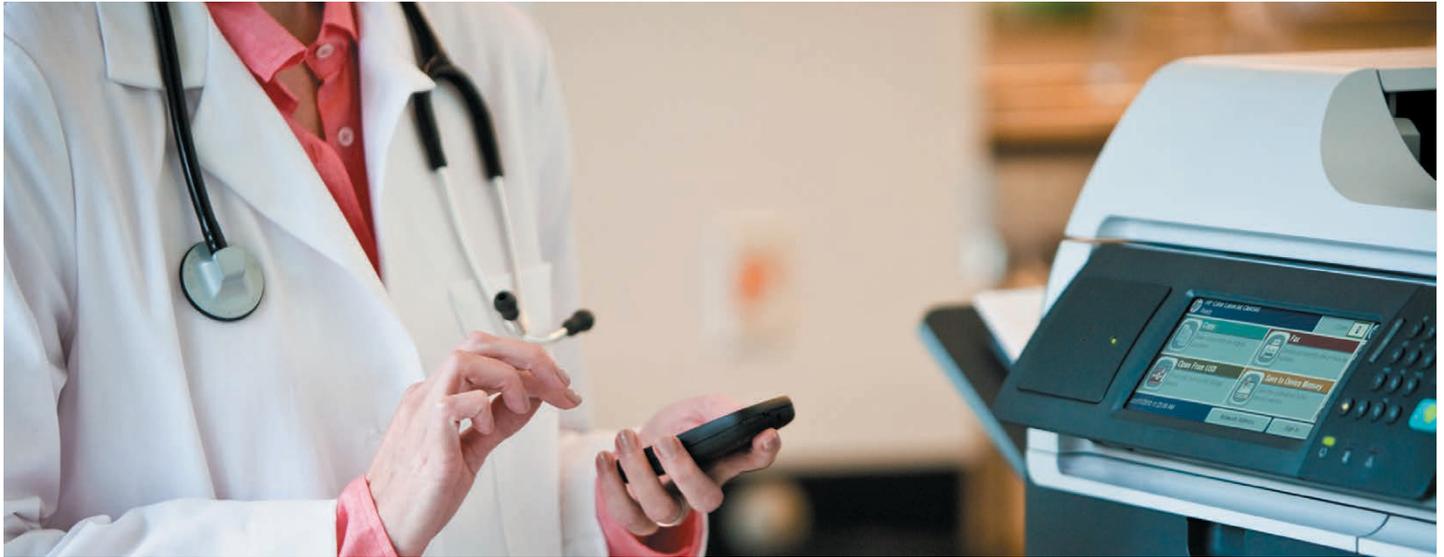

HP ePrint Enterprise Mobile Printing Solution revolutionizes healthcare workforce productivity

What if you could…

- Save your organization time and money by printing high-value documents on plain paper, or by adding new security features to pre-printed security stock paper?

- Protect your organization from loss, censure, or liability by adding proven fraud prevention features to your documents?

- Print high-value documents with security features at a single location, or anywhere on the network, using HP enterprise-class PCL5 LaserJet printing devices?

Solution at a glance

HP ePrint Enterprise is a cloud-based mobile printing solution that makes it easy for healthcare workers to print from mobile devices to any registered printer on your networks, along with thousands of HP ePrint Public Print Locations.[1] The solution is easy to manage, scalable, and secure, and preserves administrator control even in a BYOD environment.

And with HP ePrint Enterprise integrated into your Electronic Medical Records (EMR) app, bedside patient consultation can now include visual reference to relevant personal data, results, instructions, and graphics that can then be printed immediately on-site.

Printing access to keep pace with healthcare

When clinicians can print documents securely and easily on the go, your administration is more productive and can meet patient demands more efficiently. With HP ePrint Enterprise, clinicians can print from smartphones, laptops, tablets, or email accounts to your healthcare organization's networked printers, or to thousands of HP ePrint Public Print Locations.
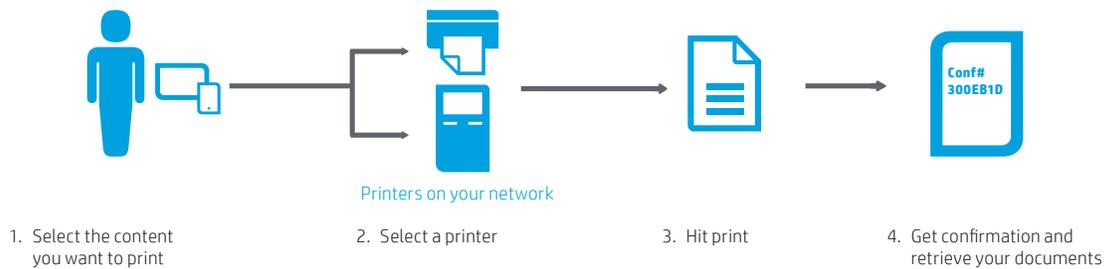

Enhanced data security and control

By enabling mobile printing from Mobile Device Management (MDM) solutions, HP ePrint Enterprise helps you preserve security controls without compromising your administrative employees and clinicians' productivity. Both the HP ePrint Enterprise for Good™ app[1] (available for Android™ and iOS™) and the HP ePrint Enterprise for BlackBerry® 10 app place corporate data in a secure container—preventing contact with the open Internet and personal apps.

Easy mobile printing from any device

Clinicians can print documents from any email-capable device;[1] from the HP ePrint Enterprise app for Android or BlackBerry; and from the HP ePrint Mobile Driver for laptops and tablets. Nearly every file type is supported. Plus, HP ePrint Enterprise is a driverless solution, so clinicians can

print to all networked printers—including both HP and non-HP models.

HP ePrint Enterprise, an easy-to-use mobile printing solution with the security features your healthcare administration requires

Printers on your network

1. Select the content you want to print
2. Select a printer
3. Hit print
4. Get confirmation and retrieve your documents

Application support for BlackBerry, Apple®, and Android mobile devices.[1] Plus, enhanced print security and IT control via MDM solutions such as the HP ePrint Enterprise for Good app and the HP ePrint Enterprise app for BlackBerry 10.

Convenient connectivity

Administrative users and clinicians can quickly locate and print to the nearest networked printer available, using a context-based directory of printers. Plus, mobile users have access to HP Public Print Locations across the country.

Increased visibility

Administrators can set policies for who can print, what they can print, and where they can print.

Other security and print management features include:

• Enterprise-level security safeguards— manage robust security systems and integrate with your administration's pull- and personal identification number (PIN)-printing solutions.

• Database synchronization—leverage your existing user database by automatically syncing with existing Lightweight Directory Access Protocol (LDAP) organizational databases or manually synchronizing using a CSV file.

Why HP?

For more than 50 years, HP has been partnering with leading healthcare organizations, supplying the technical expertise and business savvy required to position these companies at the forefront of healthcare innovation. Today, industry analysts rank HP as a leading provider of information technology and services to the health and life sciences industry. In fact, nearly half of the top 10 healthcare equipment and services companies are HP Managed Print Services clients.[2]

HP's patient-centered healthcare solutions enable providers and empower patients with more powerful and intuitive solutions that deliver better care. We can help you improve care delivery, patient engagement, and population health management.

We will take the time to understand your specific needs and create a plan to help optimize your fleet, ensure data and document security, and manage your evolving workplace.

Get started

Contact your local HP representative to:
• Set up a workshop to assess your specific business needs.

• Establish a plan to implement the best solution for today and into the future.

• Identify an environmental approach that can help your organization save money.
