

Control, secure, save

HP Access Control Printing Solutions enable mobility, security for healthcare payers

What if you could...

- Enable employee mobility within your network?
- Make more printers available to your work group?
- Reduce print output, print costs, and support costs?

HP Access Control Printing Solutions feature a pull printing process that ensures that only what employees physically “pull” from a printer is actually printed. By eliminating lost, duplicate, and forgotten print jobs, it reduces waste and security exposures, freeing you to focus more on the business than on the paper documents that support it.

Solution at a glance

Large health insurance companies today face the challenge of managing complex workflows involving a high volume of documentation accompanied by ever growing costs. The growing network of personal devices has only added to rising costs and complexity of management. The current economic climate coupled with the implications of health reforms are driving health insurance payers to consider innovative solutions to cope with rising costs, increased risk, and the need to drive business innovation. One such innovation secures the flow of paper documents through a “pull printing” process, which actually helps make workflows more efficient, lowers costs, and reduces energy use. Pull printing enables a worker to send a print job from their PC and then retrieve that print job from any printer on the corporate network. This enables mobility and improves printer availability while lowering support costs for the organization. In addition,

pull printing reduces paper consumption and toner waste, which supports corporate environmental initiatives.

Security

Only valid users can ‘pull’ a print job using an authentication PIN or proximity card from any enabled device, from anywhere within the organization, preventing sensitive data from lying unattended in an output tray.

Reporting

The solution offers flexible and detailed management reporting by end user, cost center, line of business, and site—down to the individual device.

Governance

You can implement policies and rules for printing, to reduce unnecessary printing and further steer toward social responsibility and environmental stewardship.

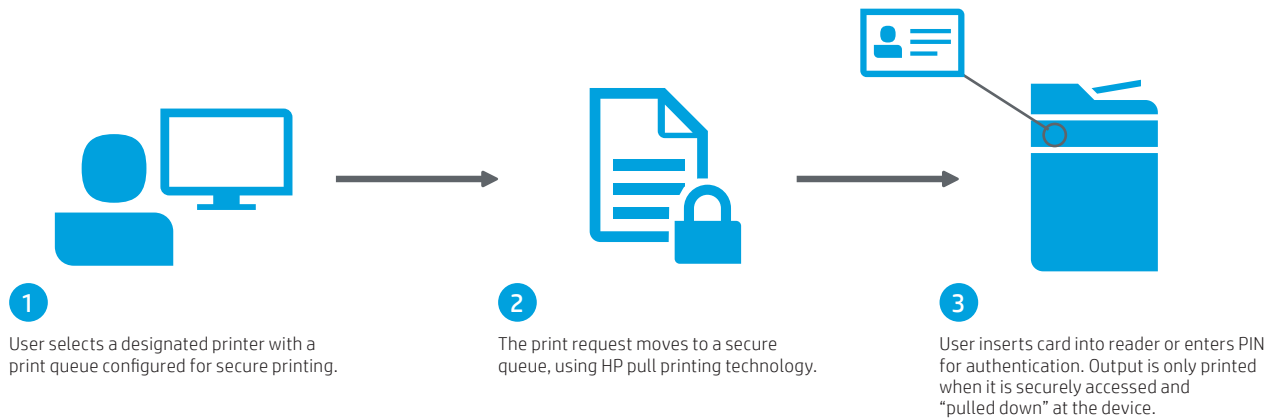

Elimination of abandoned prints

You can now schedule a regular purge of unclaimed print jobs—avoiding multiple and misdirected prints—potentially saving thousands of dollars per month.

Continuous improvement

The solution allows for transparency in reporting on organizational printing, enabling you to map and measure improvements.

Secure pull printing technology enables mobile and secure printing for healthcare payers

HP Access Control Printing Solutions provide accurate accounting, transparency, and a distribution of services across the organization, simplifying the print and imaging environment, and improving security and efficiency while ensuring that health insurance payers like you are proactive in reducing administrative costs and protecting the personal health information of its members.

Why HP?

For more than 50 years, HP has been partnering with leading healthcare organizations, supplying the technical expertise and business savvy required to position these companies at the forefront of healthcare innovation. Today, industry analysts rank HP as a leading provider of information technology and services to the health and life sciences industry. In fact, nearly half of the top 10 healthcare equipment and services companies are HP Managed Print Services clients.¹

HP's patient-centered healthcare solutions enable providers and empower patients with more powerful and intuitive solutions that deliver better care. We can help you improve care delivery, patient engagement, and population health management.

We will take the time to understand your specific needs and create a plan to help optimize your fleet, ensure data and document security, and manage your evolving workplace.

Get started

Contact your local HP representative to:

- Set up a workshop to assess your specific business needs.
- Establish a plan to implement the best solution for today and into the future.
- Identify an environmental approach that can help your organization save money.
