Brief

Collaborate with confidence

HP Flow CM

Transform the way you access, manage, and share files

- Streamline workflows and collaborate more productively with convenient sharing and notification tools.
- Connect to your business information from wherever you work.
- Find what you're looking for with precision and speed.
- Make paper and digital files more accessible with cloud-based document management—without sacrificing IT control.
- Safeguard important business data.

[1] Requires an Internet connection. Supports Internet-capable mobile devices running an iOS or Android app or scaled experience from the browser with separately purchased wireless Internet service. Separately purchased data plans or usage fees may apply. Connection speeds may vary. HP Flow CM is available in the United States and Canada only, through select HP partners. Supported web browsers include Microsoft® Internet Explorer 8, 9 and 10, Google Chrome™, Firefox, and Safari.
[2] Drag and drop with IE10, Google Chrome™, and Firefox.

Quick access to the information that powers your business

Are you tired of email attachments filling up your inbox? Or worried about posting sensitive business documents on public sites? Is it difficult to stay in sync with your colleagues and quickly find the latest versions of your files? Now, there's a better way to collaborate, share files, and access your business information, with HP Flow CM. This powerful collaboration software provides a central file system in the cloud, so the content you need is always only a few clicks away. Work with others where and when you want, using your smartphone, tablet, notebook, or desktop computer.[1]

Seamless connectivity

Create personal folders and set sharing permissions for a simpler way to share large files. For external partners, you can publish a direct link to a file, without granting access to your folders. Track all document exchanges with colleagues, receive email notices when files are revised, and easily control versions. Automatic synchronization between your PCs and HP Flow CM helps keep everyone aligned.

It's easy to move documents into the system. Simply upload files or drag and drop from your desktop.[2] Or scan paper documents directly to the cloud, with support for both HP and non-HP MFPs and scanners. You can also capture documents using the camera on your mobile device with the HP Flow CM app. This app includes HP PageLift—a unique, patent-protected HP technology that automatically detects edges, straightens, crops, and sharpens the image. Industry-leading optical character recognition (OCR) lets you search across all the text in scanned or captured documents.

Always have access to the latest files, even on the go, using your favorite mobile device. Pull and print documents from shared folders in the cloud right from your HP MFP's control panel.

Pinpoint accuracy

Quickly locate the exact information you need with full-text searches of more than 1,000 file types across your content library. Search for file names, folders, tags, or terms in your documents. You can even refine your searches with Boolean operators to intentionally include, exclude, or group targeted keywords. Rely on HP IDOL to search and retrieve content in many major languages, and avoid sifting through irrelevant query results.

HP Flow CM is the smart way to collaborate—keeping your feet on the ground, while your information stays safe in the cloud

Collaborate more effectively

- Publish a link for anyone to view and download the most recent version of a file, even those outside your company.
- Share a file or folder with any other HP Flow CM user.
- Maintain version control with unlimited number of versions.
- View an audit trail for complete document history.
- Receive email notifications for file and folder changes.
- Insert document comments for extended collaboration.

Provide anytime, anywhere access

- Stay connected on the go with mobile apps for iOS and Android, available from your app store.
- Capture clean, searchable documents with your mobile device's camera with HP PageLift.
- Synchronize files and folders between PCs and HP Flow CM.
- Upload or print documents from an HP MFP control panel app or use the Scan2Cloud app to scan to the cloud with both HP and non-HP MFPs and scanners.

Find files quickly and easily

- Perform full-text searches of more than 1,000 file types, including mobile uploaded content.
- Increase search performance with built-in OCR that covers the full document, from the first page to the last.
- Narrow search results using multi-word and Boolean operators.
- Get intelligent search results with HP IDOL technology, which understands the meaning of terms.

Empower users without sacrificing IT control

- Manage user and sharing permissions.
- Set up user accounts fast and efficiently manage user identities with Active Directory.
- Maintain a defensible audit trail of user access and all changes made to files.
- Maintain control of your data even when employees leave your company by moving files from one user to another.
- Get the features you need and pay as you go with monthly subscriptions.
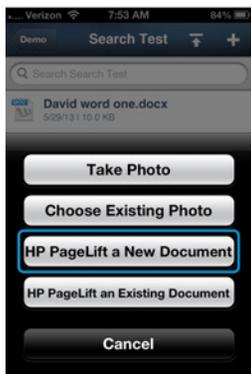

Safeguard your important information

- Help keep your confidential information from falling into the wrong hands with industry-leading tools to control and monitor the use of data stored in the cloud.
- Safeguard data in transit and at rest with AES 256-bit encryption.
- Count on highly protected data centers that meet ISO, SSAE16, SOC1 and SOC2 standards.
- Prevent unauthorized access with enterprise-level password protection.

Do more together

HP Flow CM can transform the way you access, manage, and share files, so you can be more productive—and more collaborative—than ever. You can benefit from industry-leading cloud storage without the costly commitment of new hardware, software, or IT staff. This solution is easy to deploy, maintain, and scale as your business needs change. You can enjoy peace of mind, knowing your data is encrypted and stored in highly protected HP data centers. Best of all, this end-to-end content management solution is backed by HP, and our strong commitment to reliability and IT support.

## Using HP PageLift on your mobile device with the HP Flow CM app

1. **HP PageLift a New Document**
2. **Position the document and take a photo**
3. **Automatically detect edges, straighten, crop, and sharpen**
4. **Upload to HP Flow CM**
5. **You now have a clean, searchable document**
