HP and LRS Output Management Solutions for Healthcare Providers

HP and LRS Output Management Solutions

Assured records delivery and scalable output management for your HP device fleet

What if you could:

Eliminate costly printing problems and clinical disruptions?

Save more than \$500,000 USD for every 1,000 managed printers—money that can now help you meet Meaningful Use criteria?

Reduce the number of printing-related support calls by 60 percent to 80 percent, freeing up your IT department to work on electronic medical records (EMR) projects?

Generate a three-year return on investment of 310 percent and a six-month payback?

The cost of printing failures in healthcare

Analysts estimate that one percent to three percent of an organization's revenues are spent on document output. Furthermore, 30 percent of all clinical and back office process interruptions result from information delivery failures. When it comes to managing your critical patient records, the stakes couldn't be higher.

Solution at a glance

LRS Enterprise Output Management Software

LRS Output Management Software provides a scalable, full-featured environment for managing all of your patient records and back office documents. Acting as a central point of document control, the software captures documents from any application, converts the data to a printer-ready format, and reliably delivers it to the target device or destination.

Administrators can quickly detect and address hardware or network-related printing errors from an intuitive web interface. Full-featured print audit and tracking functions are available to aid in compliance and cost reduction efforts.

The LRS solution lets end-users view critical healthcare content via mobile devices and/or release sensitive documents to departmental multifunction printers (MFPs) for secure printing. LRS software helps customers get maximum value from their HP output devices and prevents costly business disruptions in order to save you money.

Working together with HP

HP business partners offer leading-edge solutions that integrate with HP's wide portfolio of Printing and Personal Systems solutions, and provide HP customers with an unparalleled breadth and depth of solution offerings around the world—solutions that streamline processes, positively impact productivity and mobility, and most importantly, improve patient outcomes.

LRS enhances printing output for EMR/health information system applications

The LRS solution provides features that lower the cost of managing clinical and business content.

- **Assured document delivery** – Integrates with healthcare applications to verify document status for better, faster patient care with fewer help desk calls
- **Electronic forms support** – Tightly integrates with electronic forms solutions to eliminate the need for costly pre-printed forms and tamper-proof paper
- **Simple configuration** – Browser-based printer configuration streamlines system administration
- **Multi-application support** – Consolidates output from healthcare applications, Windows servers, and other systems for a cost-effective, central point of control

Customer benefits of LRS software include:

- **Improved patient care** – Fewer printing problems occur, which means faster delivery of critical healthcare documents
- **Better regulatory compliance** – Secure document delivery features help with HIPAA and Meaningful Use requirements
- **Lower costs** – Fewer printing problems means fewer costly help desk calls; electronic document delivery features help reduce total pages printed
- **Improved downtime reporting** – Gives clinicians access to medication administration reports and other critical reports during planned or unplanned downtime events

LRS Output Management Solutions for HP customers

Service and support

For more than three decades, LRS has provided output management solutions, services, and support for some of the world's largest healthcare organizations. LRS works closely with HP to ensure that its software solutions are optimized in an HP infrastructure, and help to extend HP's Managed Services return on investment.

Building on the value of strong relationships

By working side-by-side with HP, we have all the resources, experience, and knowledge we need to deliver customized solutions that meet your unique business requirements. For more than 50 years, HP has designed solutions that allow customers to actively anticipate change, and then act on it. Together, we use future-focused technology and services to design solutions that produce lasting value and maximum results—helping you meet today's challenges while preparing for tomorrow's.

Solution benefits

With HP and LRS Output Management Solutions you can:

- Reduce the cost of delivering clinical and back office records
- Eliminate reliance on Microsoft® Windows® print servers
- Streamline and automate downtime reporting
- Protect sensitive information via pull printing and document encryption
- Enable records auditing for improved security and compliance
- Support rapid implementation in days or weeks instead of months
