HP EliteOne 800 G1 All-in-One PC

Impressive performance that fits right in

Impressive performance that fits right in. The design looks amazing. Your business performance will look even better. Trust your mission-critical projects to an all-in-one PC that's built to handle the demands of virtually any business environment. Power your workday with a secure, enterprise-class PC that's easy to manage and just as reliable as it is stylish. Integrate optional touch computing in select models for a truly hands-on experience.

Stylish efficiency from edge to edge

- Turn the front room into the showroom, and optimize the space of your back room as well. With slim, sleek glass across a 23-inch diagonal screen, this all-in-one PC impresses virtually anywhere.
- Stay organized and free up more room for work. This space-saving all-in-one has several stand options, and easily mounts on the wall.¹

Fast-track your performance

- Quickly open new files and switch applications with less wait time thanks to solid-state drives and solid-state hybrid drive options.² Get the latest processing technology with a choice of 4th generation Intel® Core™ processors.³
- Watch your inbox while working on other tasks. Connect up to four displays, using the digital DisplayPort with multi-stream and optional discrete graphics card.⁴
- Intel® Smart Response Technology (SRT),⁵ a disk cache solution, delivers similar performance associated with Solid State Drives while retaining the data storage capacity of today's large Hard Disk Drives.
- Make the most of virtual conferencing. Bring work to life through rich sound and video using DTS Studio Sound and an HD webcam.⁶

Experience the simplicity of touch in select models

- Delight users with the intuitive control of an optional 10-point capacitive touchscreen that makes the most of Windows 8.⁷ Rotation sensors let you see what's on screen as it was meant to be displayed by rotating from landscape to portrait.⁸

The hub of your mobile world

- Speed up charging with a fast charging USB port. The nearly 2.8x stronger charging current helps compatible devices charge faster than standard USB 3.0 ports.⁹
- Easily share your internet connection with your devices and help colleagues get online fast with HP Wireless Hotspot.¹⁰
- Maintain tighter control over device security. Use the optional integrated near-field communications (NFC) capabilities to support custom applications such as advanced user authentication.¹¹

Heavy security, efficiently managed, reliability for the long haul

- Keep it secure, keep it simple. IT efficiency reigns supreme when it's backed by a full portfolio of HP Client Security¹² and Intel vPro¹³ management features.
- Save your data. RAID configurations utilize dual storage drives to automatically back up and help protect your sensitive data.^{14 15}
- Count on the support you need to get long-term value out of your investment. This work-ready PC is designed for a long lifecycle, with platform stability up to 30 months.
- Rest assured. Talk to an agent any time and get priority service at any HP repair center with HP Elite Premium Support, at no additional charge.¹⁶
- HP EliteOne PCs are rigorously tested to help ensure reliability. During the HP Total Test Process, our PCs experience 115,000 hours of performance trials to help get you through your business day.

Messaging Footnotes

¹ Wall mounting hardware sold separately.

² Solid State Hybrid Drives planned to be available October 2013.

³ Multi-Core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel® architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers, and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel® 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. Intel's numbering is not a measurement of higher performance.

⁴ Support for external displays as a standard feature through integrated processor-based graphics is dependent upon the particular PC platform/form factor; the actual number of displays supported will vary. An optional discrete graphics solution will be required for the support of additional displays. Additional cables required. DisplayPort with multi-stream through integrated graphics is planned to be available in fall 2013 as an integrated feature and as a web update in late summer 2013.

⁵ Requires a compatible Intel® Core processor, enabled chipset, Intel® Rapid Storage technology software and non-SED HDD + optional mSATA SSD flash cache module. Intel® Smart Response Technology is only available on select 2013 HP systems. Depending on system configuration, results may vary. mSATA SSD is planned to be available in August 2013.

⁶ Webcam and internet service required for video conferencing, and not included.

⁷ Not all features are available in all editions of Windows 8. Systems may require upgraded and/or separately purchased hardware, drivers and/or software to take full advantage of Windows 8 functionality. See <http://www.microsoft.com>.

⁸ Display only rotates with height adjustable and reclining stand or by mounting in portrait position using the VESA wall mount.

⁹ 2.8x compared to USB 3.0. 5x compared to USB 2.0. Charging times will vary by device depending on compatibility with fast charging port.

¹⁰ The wireless hotspot application requires an active internet connection, separately purchased data plan, and separately purchased wireless NIC card. While HP wireless hotspot is active, on-device applications will continue to work and will use the same data plan as the wireless hotspot. Wireless hotspot data usage may incur additional charges. Check with your internet service provider for plan details. Requires Windows.
