Brief

Get a full overview and control the cost of your printer fleet

HP and EuroForm JetAdvice print fleet management solution

What if you could:

- Know at a glance how all devices are used across your fleet, enabling fact-based decisions?

- Enable just-in-time supply delivery and eliminate toner waste and unnecessary expenses?

- Curb CO2 emissions and minimize the power consumption of devices?

- Simplify maintenance, keep your fleet functioning properly, and prevent down time?

Fleet management cost control

Managing a large number of HP LaserJet and multifunction printers (MFPs) while maintaining control of all costs can often be a challenge. For many types of these devices, as well as outdated devices, a common issue with cost is related to supplies.

JetAdvice – your worldwide print fleet solution

Using the cloud-based JetAdvice solution will give you complete data collection on all networked and non-networked devices, all visible online. The complete dataset provides a solid basis for making informed decisions to make your company's printer fleet more efficient and reduce costs.

Automate the ordering of supplies to get the correct replacements when you need them and reduce inventory. In today's market, one printer does not fit all business needs, but how do you know the needs of your printers? JetAdvice is the solution to help you make the right decisions, from buying supplies to optimizing their use over time.

Working together with HP

Silver HP business partners offer leading-edge solutions that integrate with HP's wide portfolio of LaserJet imaging and printing products, and provide HP customers with an unparalleled breadth and depth of solution offerings around the world.

JetAdvice adds value and extensibility through its strong compatibility with HP devices. The JetAdvice Data Collector is installed on the customer's network and collects data from the printers, such as the number of pages printed, supplies usage and coverage, service events, A4/A3 pages, simplex/duplex, copies, and scans.

The Data Collector sends this information to JetAdvice Manager. The information is then available via a Web browser for export to a .csv or .xml file for further processing and analysis.

Solution benefits
With HP and JetAdvice you can:

- Get control of your entire printer fleet

- Carry out assessments, based on real data from installed devices

- Optimize printer fleet configuration

- Know the exact environmental impact of your printer fleet

- Select the HP LaserJet printer or MFP that meets your needs

- Obtain a complete list of your installed printer fleet printer type, category, usage (pages and supplies), age, specifications, and more

- View a complete cost overview, including power consumption

Our solution partner

Easy, reliable cost control

Introduced in 2002 and available through a worldwide channel, the JetAdvice solution is a set of different robust and high quality products to manage your print fleet. JetAdvice allows you to make smart decisions by delivering the right data, accurately and on time, offering complete understanding of the fleet at your fingertips.

Utilizing the JetAdvice application programming interface (API) or the report functionality, integration with enterprise resource planning (ERP), customer relationship management (CRM), and most other business systems is easily achieved.

Sustainability is on the agenda for many companies today, looking for ways to cut CO_2 emissions and reduce carbon footprints. JetAdvice is the right tool to take advantage of the extensive data collected from your devices and create meaningful reports to understand exactly how your fleet is being utilized and reduce your impact on the environment.

Optimize use and manage your fleet with JetAdvice Data Collector, one of the most comprehensive tools for gathering important and accurate print fleet data available.

Service and support

Working with HP services, we provide you with a complete portfolio of services tailored to your unique business and IT needs. We leverage the proven methodologies and expertise of more than 65,000 HP services professionals around the world to help your company design, build, integrate, manage, and evolve an infrastructure that lets you respond to business changes easily and cost-effectively.

Building on the value of strong relationships

By working side by side with HP, we have all the resources, experience, and knowledge needed to deliver customized solutions that meet your unique business requirements. For more than 50 years, HP has designed solutions that allow customers to actively anticipate change, and then act on it.

Together, we use future-focused technology and services to design solutions that produce lasting value and maximum results—helping you meet today's challenges while preparing for tomorrow's.
