

# Keep business moving

## HP Flow devices and workflow solutions

### HP Enterprise Flow MFPs

HP's line of Flow MFPs includes color and black-and-white devices, LaserJet and Officejet choices, and even advanced finishing options

### HP Scanjet Enterprise Flow 7000 s2 Scanner

Named Editor's Choice by Better Buys for Business

### HP Digital Sender Flow 8500 fn1 Document Capture Workstation

Winner of BLI's Summer 2012 Pick Award—Outstanding Network Scanner<sup>3</sup>

To maximize the value of information, businesses need advanced capabilities for efficiently capturing, managing, and sharing digital content throughout the organization. HP's portfolio of Flow devices integrates seamlessly with leading workflow solutions to help you reduce costs and increase productivity.

## Transform your paper-based processes

Are you struggling with too much paper, difficulty in finding information, inefficient processes, and regulatory requirements? An effective document management solution can yield dramatic savings for your business by simplifying the way workers capture, store, access, use, and share content.

HP's award-winning portfolio of Flow MFPs, scanners, and digital senders are optimized to quickly and accurately capture and digitize your documents. HP Flow devices:

- Offer robust, enterprise-level scanning and workflow features
- Are easy to use
- Work with your current applications and hardware
- Integrate with both HP and third-party workflow solutions

HP also offers powerful capture and document management applications to simplify your workflow, including HP Digital Sending Software<sup>1</sup> and HP Flow CM Professional.<sup>2</sup>

The unique HP lineup of Flow devices and capture solutions delivers versatile features designed to accelerate document workflows, improve collaboration, and boost productivity.

## Save time with HP Flow devices

HP created a whole new imaging and printing category when we introduced our portfolio of Flow MFPs, scanners, and digital senders. These capture-and-route optimized devices are packed with innovative features to help you unlock content in paper documents and work more efficiently.

### HP LaserJet/ Officejet Enterprise Flow MFP

Color M880**

### HP Digital Sender Flow Document Capture Workstation

**8500 fn1**

### HP Scanjet Enterprise Flow Scanner

**5000 s2, 7000 s2,  
7500, N9120**

#### Increased performance and speed

- Dual-head, single-pass duplexing automatic document feeder (ADF) saves time and reduces wear and tear on documents
- Fast scan speeds capture documents quickly

#### Superior recommended scan volumes

- Robust scanning duty cycles keep intervention rates low

#### Advanced paper handling technology

- HP EveryPage delivers reliable separation and picking that minimizes the chance of a misfeed—even for pages that vary in weight, size, or condition—as well as intelligent safeguards that save the work you’ve already performed<sup>4</sup>

#### Embedded workflow capability

- Embedded optical character recognition (OCR) for creating searchable files
- Scan to multiple destinations, including email, networked folders, Microsoft® SharePoint®, and HP Flow CM
- Advanced workflows are customizable through the scan software or at the device touchscreen

#### Easy, intuitive user experience

- Launch workflows at the touch of a button
- Advanced, automatic image correction enhances digital data and keeps it faithful to the original

#### Integrated enterprise features

- HP Easy Select color touchscreen with robust image preview features, plus external pull-out keyboard for fast, accurate data entry
- Enterprise networking and security
- HP FutureSmart firmware and OXP solution platform with direct control panel integration of HP or third-party document solutions

#### Compatible with HP Flow CM Professional<sup>2</sup>

- HP’s cloud-based content management solution, Flow CM, can be customized as a scan-to destination

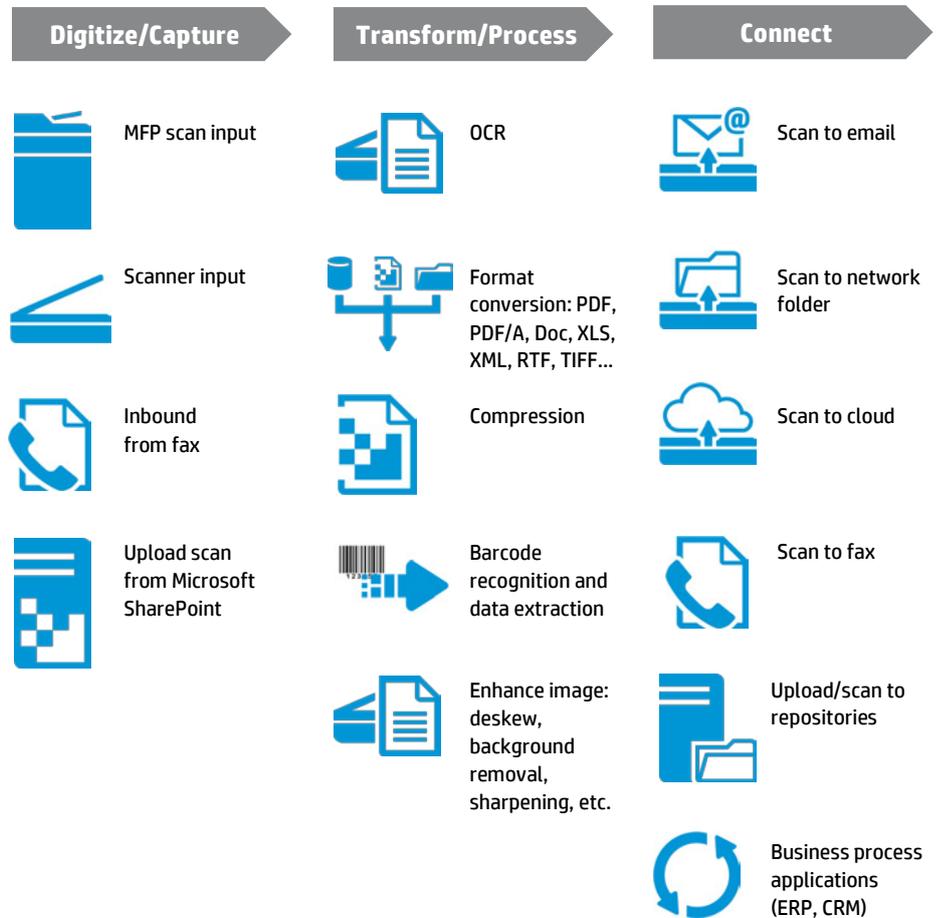

(Pre-configured in 5000 s2 model)<sup>5</sup>

## Move between paper and digital content efficiently

HP's powerful workflow and document management solutions make it easy to capture, store, access, and share your important business information. Most capture solutions include features to:

1. Digitize the information from a document
2. Convert the document into a form usable in another application or prepare it for storage
3. Transport (or connect) the document to another destination(s)

## Boost productivity with HP workflow solutions

Choose the HP capture and routing solution that best meets your needs:

- **HP Capture and Route**—A server-based solution to easily convert paper documents into a variety of digital formats. Route information right where it is needed at the touch of a button.
- **HP Embedded Capture**—A simple capture and workflow solution that doesn't require a server and provides TWAIN support.
- **HP Digital Sending Software**—An advanced document capture and routing solution for quickly and securely sending scans to email, network folders, printers, fax services, and more.<sup>1</sup>
- **HP Flow CM Professional**—Collaboration software that lets you store your business documents in the cloud, so you can easily and securely access, manage, and share information from virtually anywhere, on any device—even your laptop, tablet or phone.<sup>2</sup>

Your secure cloud or on-premise workflow solution can be up and running in days, because it works in your existing tech environment. IT can choose the most appropriate configuration, providing for control over users and data as well as security and availability. And users will appreciate time-saving features that make business processes faster, easier, and more efficient.

## Better together

The right combination of workflow applications and devices can help your business cut costs and improve productivity. HP Flow MFPs, scanners, and digital senders integrate with both HP and third-party solutions for smooth workflows. And HP Flow CM supports both Flow and non-Flow devices, along with products from other manufacturers.<sup>2</sup> HP MFPs, all-in-ones, scanners, and digital senders can be tightly integrated with HP Flow CM, making it a snap to send to or print from your HP Flow CM folders.

### Notes

<sup>1</sup> HP DSS is not supported by HP Scanjet Enterprise Flow 5000 s2, 7000 s2, 7500, or N9120 scanners.

<sup>2</sup> HP Flow CM Professional is available in the US and Canada only and through select HP partners.

<sup>3</sup> BLI Pick Award was given to the HP Scanjet Enterprise 8500 fn1 Document Capture Workstation, the previous name for what is now called the HP Digital Sender Flow 8500 fn1 Document Capture Workstation.

<sup>4</sup> HP EveryPage is referred to as HP Precision Feed on Scanjet devices introduced before 2013.

<sup>5</sup> 7000 s2, 7500 and N9120 scanners can send to HP Flow CM in two ways: use the sync folder feature (scan to that folder, then the document is automatically uploaded to the site); or use the Scan2Cloud app from HP Flow CM (app is installed on the computer, connects to the scanner through WIA, and then scans directly to the site).
