

HP NFC/Wireless 1200w Mobile Print Accessory

Simplify wireless printing

Easily add wireless direct printing and touch-to-print technology to your HP printer or MFP—and enable the entire office to print from smartphones, tablets, and notebook computers.^{1,2,3}

Just go and print

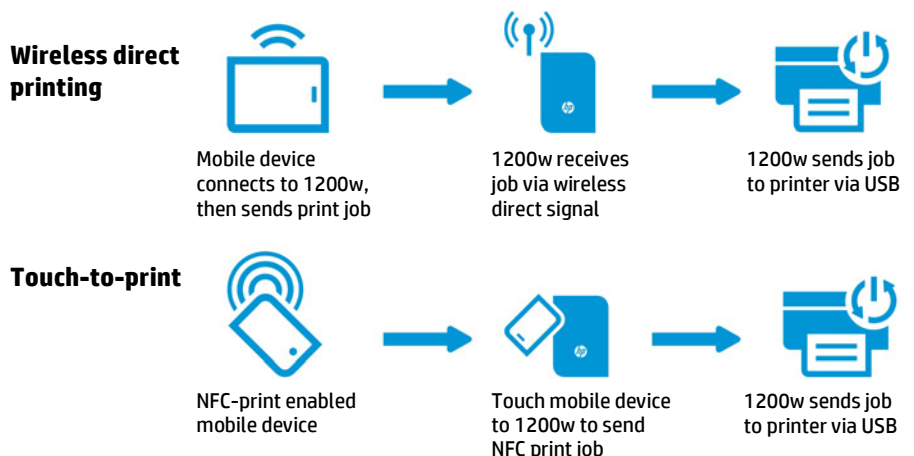

The HP 1200w Mobile Print Accessory plugs into a USB port on supported HP printers and MFPs, enabling both wireless direct printing and touch-to-print.

- Make wireless printing easy for everyone in the office. With wireless direct printing, simply connect your mobile device to the HP NFC/Wireless 1200w that is connected to your HP printer or MFP in the same way you would discover and connect to a public wireless network.
- Walk up and print from your NFC-print enabled smartphone or tablet with just a touch. NFC, or near field communication, automatically discovers the printer for you, eliminating the guesswork and creating a one-to-one connection using wireless technology.
- Get up and running fast with easy USB installation.
- Keep your network out of it. Both wireless direct and touch-to-print technologies use a peer-to-peer connection, allowing mobile users to print without accessing the company network.
- Safeguard your business information. Print files are sent using 128-bit encryption.
- Stay in control. When you enable a pass phrase through the HP Embedded Web Server, you're in charge of who can use your printer.

Easily print from mobile devices

HP has been working closely with leading manufacturers of mobile devices to integrate printing into popular operating systems. In fact, HP is the only print vendor developing embedded print functionality for Apple iOS, Samsung Android, and Windows® 8, which means in most cases, you won't have to download an app.

For mobile devices without built-in print support, printing is just as simple, but users will first need to download the HP ePrint app⁴ or HP ePrint software.⁵

Notes

¹ HP 1200w Mobile Print Accessory works with HP Officejet 100/150 Mobile printers and most HP LaserJet printers and multifunction products (MFPs) introduced in 2008 or later that are equipped with a USB port.

² For wireless direct printing, mobile device may require an app or print software. Wireless performance is dependent on physical environment and distance from the printer. Please note that while your mobile device is directly connected to the printer, access to content that requires Internet support (such as web pages or documents stored in the cloud) may not be supported while in HP wireless direct mode.

³ For touch-to-print capability, mobile device must support NFC-enabled printing. For a list of supported devices, see hp.com/go/businessmobileprinting.

⁴ The HP ePrint application is available as a free download at Google Play and iTunes App Store.

⁵ HP ePrint software is available as a free download at hp.com/go/eprintssoftware.
