

# HP LD4730G 119,4 cm (47") Micro-Bezel Video Wall Display with Protective Glass

Perfect for eye-popping video wall installations that attract customer attention, the HP LD4730G with integrated Corning® Gorilla® Glass delivers stunning display technology and performance plus a micro-thin bezel that's virtually invisible when tiled.

## Smart technology

Use simplified Video-Over-Ethernet (VOE), an HP-exclusive video input, to more efficiently manage and deploy network-attached digital signage displays (DSDs) over the enterprise.

VOE also helps simplify installation and cabling, increase flexibility, and reduce your cost of deployment.

Associate up to 12 DSDs with a single media player. HP makes it easy to manage associations remotely from any computer on the network, helping you save time and money.

Video inputs on the DSDs provide expansive connectivity options for a range of devices.

## Out-of-the-box productivity

HP Network Sign Manager Software helps you remotely control and manage your DSD and your message.

The integrated software enables “on-the-fly” command and setting changes to one or more DSDs from a single source—perfect for businesses with multiple LAN-connected displays in different locations like stores, lobbies, offices, and travel hubs.

## Built to last

HP Digital Signage Displays are engineered for demanding usage for enhanced performance and reliability and rated to operate 24/7 in traditional retail and commercial environments.

The integrated Corning® Gorilla® Glass is durable enough to resist many real-world events that commonly cause glass failure; it's an easy-to-clean, wear-resistant coating for smooth, flat surfaces with optical clarity.

# HP LD4730G 119,4 cm (47") Micro-Bezel Video Wall Display with Protective Glass

<b>Display Size (diagonal)</b>	119,4 cm (47")
<b>Viewing Angle</b>	178° horizontal; 178° vertical
