

Brief

HP and AP Technology

APSecure Official Check Issuance System

Solutions providing unsurpassed security for bank cashier's check issuance.

What if you could:

- Centralize your bank's check disbursement process
- Simplify Office of Foreign Assets Control (OFAC) and anti-money laundering report compliance requirements for check disbursements
- Allow clients to securely print cashier's checks at their locations

Cashier's check fraud

Financial institutions are increasingly evaluating their Official Check issuance and management processes as a result of growing fraud exposure and new compliance demands.

Solution at a glance

Best-in-class fraud protection

AP Technology's APSecure Official Check Issuance Portal delivers the most advanced solution available to automate wealth management, branch, back-office, and remote-client Official Check issuance with

state-of-the-art laser-printed checks and unsurpassed fraud protection. A combination of check issuance technology, including check request, approval, and laser printing along with integrated management of your positive pay system, creates an Official Check Issuance Portal that adds convenience, cost savings, and fraud protection to your cashier's check disbursement process.

Working together with HP

Silver HP business partners offer leading-edge solutions that integrate with HP's wide portfolio of LaserJet imaging and printing products, and provide HP customers with an unparalleled breadth and depth of solution offerings around the world.

Solution benefits

- Web-based application for batch and on-demand check issuance
- Teller, remote-client, wealth management, trust, loan, and back-office cashier's checks
- Scalable, configurable approval process
- Easy, strong integration with existing positive pay system
- Robust reporting capabilities for enhanced compliance, and fraud prevention efforts

Our solution partner

APSecure security features

APSecure offers unparalleled Official Check fraud protection, with features designed to eliminate fraud at all levels of the check issuance process. Risks for internal fraud are virtually eliminated with an automated, multi-layered approval process that is configured to meet bank and client requirements. Printed-check security features, including payee- and amount-based watermarks, and security fonts, add additional layers of security that render alteration attempts nearly impossible. Check data is protected with strong encryption that is applied all the way from the server into the printer. Secure printing disables duplicates and ensures that data from the server remains unaltered. Fraud protection is further enhanced through strong integration with the bank's positive pay system, eliminating manual entry and scanning errors, and adding same-day ON-US data verification capabilities. The system also offers integrated OFAC lookup functionality, and powerful reporting capabilities for compliance and auditing purposes.

Service and support

AP Technology has partnerships with seven of the 10 leading United States commercial banks. Our skilled technical team is accustomed to working with the wide range of financial systems and security requirements, as well as a variety of users from novice to IT Pro. With AP Technology, you can expect the highest level of service for your APSecure system.

Building on the value of strong relationships

By working side-by-side with HP, we have all the resources, experience, and knowledge we need to deliver customized solutions that meet your unique business requirements. For more than 50 years, HP has designed solutions that allow customers to actively anticipate change and then act on it. Together, we use future-focused technology and services to design solutions that produce lasting value and maximum results—helping you meet today challenges while preparing for tomorrow's.
