HP and AP Technology

APSecure-RCP Remote Check Printing System

Benefit from best-practice remote check printing technology.

What if you could:

- Give remote offices or clients the ability to print checks at their locations
- Save by eliminating manual processes and express delivery charges for check disbursements
- Add an approval workflow to your check disbursement process

Distributed check issuance

Staffing companies, professional employer organizations, construction companies, title and escrow companies, or any organization that manages multiple check accounts and issues checks to a number of locations will see the benefits of implementing the best-practice of remote check printing (RCP).

Solution at a glance

Unsurpassed check issuance productivity and security

APSecure-RCP enables organizations to securely print checks to remote locations with only basic Web connectivity required. Installing APSecure-RCP streamlines the check printing process and significantly reduces check production and mailing costs, while enhancing overall fraud protection for organizations that have multiple locations requiring regular check distribution. This

innovative Web-based application offers distributed check-issuance functionality—enabling check-approval workflow, secure printing, auditing, and optional positive pay reporting for your organization. Centralized visibility and state-of-the-art security features provide process control and assurance of data integrity.

Working together with HP

Silver HP business partners offer leading-edge solutions that integrate with HP's wide portfolio of LaserJet imaging and printing products, and provide HP customers with an unparalleled breadth and depth of solution offerings around the world.

Solution benefits

- Print to as many remote locations as required, with Web connectivity being the only requirement
- Utilize unsurpassed security for check printing
- Add automated check-approval workflow to your check processing
- Eliminate manual tasks and expensive express delivery charges for check disbursements
- Experience a quick return on investment

Our solution partner

APSecure-RCP features

The APSecure-RCP system offers state-of-the-art features designed to combat current check-fraud concerns, and provides Sarbanes-Oxley Section 404 compliance.

- Multi-level user permissions
- Configurable check approval processing and management
- Printed-check security features
- Advanced audits and logs
- Optional integrated positive pay file conversion and transmission
- Optional advanced data encryption secures data from the server into the laser printer
- Complete visibility and control from your main office

APSecure-RCP also delivers a high degree of automation to check processing and reporting.

- Single server supports as many locations as required
- Automation of manual, pre-/post-issuance tasks: approvals, tracking, and optional positive pay file creation
- Simplified compliance and auditing
- Capability to print to your choice of blank or pre-printed stock

Service and support
