HP Deployment Services: Value-added Logistics Services

Deploy HP hardware without disrupting ongoing work.

Get your new hardware delivered when, where, and how you need it

With HP Value-added Logistics Services, you can deploy HP hardware on your terms. You pick the day, including non-standard working days, for your delivery, and let HP do the rest.

HP Value-added Logistic Services are available to customers who order HP hardware. These services can be ordered in tandem with HP Installation Services and HP Decommission Services. HP offers the following Logistics Services:

- HP Inside Delivery Service: provides the delivery of units to a customer's designated or specified work environment (cubicle, office, lab, or room)
- HP Unpacking and Waste Removal Service: includes the unpacking of all HP products delivered to your location and the disposal of any associated waste. HP will inventory the shipment against the packing list, unpack all products delivered, and remove packaging materials to an on-premises location you designate.
- HP Consolidated Delivery Service: provides the consolidation and delivery of all products from a single order at the same time to your specified location. One unique delivery will be made to the customer location for products originating from different HP manufacturing locations.
- HP Customized Pallet Service: enables shipments to be palletized to your location specifications (e.g., limited height or type of pallet). You can choose between industrial (100 cm x 120 cm) or European (80 cm x 120 cm) pallet sizes, or choose a pallet size based on a specific height

- HP Special Equipment and Requests Service: provides equipment solutions and/or consulting with a pre-delivery site survey when special needs exist for a delivery location such as special equipment to carry HP products from the truck unloading site to the customer's location (e.g., truck lift, crane, or external elevator) or accommodations for inside/desk delivery (e.g., a floor covering to protect the customer's work environment).
- HP Non-working Day Delivery Service: provides for the scheduling and support of basic delivery services for HP products to customers on a non-standard HP business day, e.g., Saturday or Sunday.

Why HP?

By adding HP Value-added Logistics Services to your HP hardware order, you can ensure that equipment is delivered on your terms. HP Configuration and Deployment Services allow you to work with a single, end-to-end global partner for all your configuration and deployment needs.
