

Brief

# Grading and Assessment Solution for Education

## HP and FabSoft

Quickly create custom tests with your HP multifunction printer. Scan and automatically print graded test results in minutes.

### What if you could:

- Easily create custom tests and obtain graded results in minutes
- Reduce grading errors while complying with government standards
- Be more efficient in the classroom while saving money for your school
- Begin using this solution with your HP MFP without any upfront costs

## Testing not making the grade? Working together with HP

Educators spend too much time manually creating and grading tests, quizzes, and exams. Pre-printed test forms are expensive and require specialized equipment. With the HP and FabSoft solution, educators can spend their time more efficiently while saving money for their school.

Silver HP business partners offer leading-edge solutions that integrate with HP's wide portfolio of LaserJet imaging and printing products, and provide HP customers with an unparalleled breadth and depth of solution offerings around the world.

## Graduate to automatic test creation and grading

The HP and FabSoft solution uses Optical Mark Recognition technology in a cloud-based Software-as-a-Service (SaaS) facility with a modest monthly fee and no upfront costs for use on your HP multifunction printer (MFP). The resulting bubble sheets are the ubiquitous form worksheets for classroom testing, grading, and student record keeping. The low cost has an immediate impact on annual budgets. School staff can take advantage of their HP MFP, eliminating the need to purchase new hardware. The savings can be used for more important needs in the classroom. Out of the box, the solution accommodates sophisticated workflows including student tracking and integration with student record systems.

**Solution benefits**

- Make the maximum use of the investment in your HP MFP
- Save time and money spent manually creating and grading tests and exams
- Incur no upfront costs; simply pay a low monthly fee for unlimited use
- Create on-demand evaluation, admission, and registration forms
- Implement sophisticated tracking, analysis, and workflows if desired

**Our solution partner**

**The cloud – as easy as 1, 2, 3 Service and support**

The HP and FabSoft Grading and Assessment Solution for Education is quick to install and intuitive to use in three easy steps.

**Step 1** – With a few keystrokes, test forms are easily printed directly from the LCD screen on your HP MFP. Standard test forms are selected or custom quick forms can be created on the fly.

**Step 2** – Completed test forms and answer keys are scanned in no particular order to the cloud for grading and analysis.

**Step 3** – Within minutes individual test results are printed along with a class summary sheet for teacher review and teacher records. The graded tests show the percentage of correct answers and identify the right answers for missed questions. Test results are optionally updated to the student/classroom database for analysis, and tracking and integration with student records systems.

The HP and FabSoft Grading and Assessment Solution for Education is very popular as a hosted cloud service, but can also be installed on a local server onsite. This model, often used by universities, is ideal where proximity is important to sophisticated output workflows and student records systems.

The cloud service installs on your HP MFP with little or no IT support—even though, support is included with your subscription. A turnkey solution is available when sophisticated back-end workflows and integration into Student Records Systems is desired. Contact your HP Representative to learn more.

**Building on the value of strong relationships**

By working side by side with HP, we have all the resources, experience, and knowledge needed to deliver customized solutions that meet your unique business requirements. For more than 50 years, HP has designed solutions that allow customers to actively anticipate change, and then act on it. Together, we use future-focused technology and services to design solutions that produce lasting value and maximum results—helping you meet today challenges while preparing for tomorrow’s.
