

# HP Designjet printing solutions for Education

Boosting the learning process—in a big way

Growing minds think big. That's why it's important to encourage creative thinking with large-format signs, displays, and other learning tools that help promote everyday communications, enhance teaching effectiveness, and more. HP Designjet printers—helping students make the grade.

## Prepare students for the future

### **Easily print creative full-color interactive visual aids, communications, and activity graphics without leaving your school or learning facility**

Whether you're teaching toddlers in day care or adults at the university, visual aids are considered one of the most effective methods of communicating, instructing, and learning. Fortunately HP Designjet printers offer affordable, easy-to-use solutions for educators and students alike. Plus they can be easily integrated into student learning objectives and most educational environments.

### **Bring large-format printing capabilities into your school or learning facility—save time and eliminate outsourcing costs**

- Personalize and print visual aids for classroom use—on demand
- Let students explore careers that utilize large-format printing—i.e., graphic arts, marketing, photography, interior design, engineering, construction, and more
- Print detailed large-format maps and charts—with excellent image quality
- Reinforce class goals and highlight student achievement

**HP Designjet large-format prints are ideal for getting students' attention in classrooms, hallways, gymnasiums, theaters, and even outdoors**

Print class or workshop graphics, visual aids, high-quality color charts and maps, and professional-quality posters and graphics—all in large format. HP Designjet printers are at the top of their class with fast, intuitive operation and low overall costs.

### School facilities and workshops

In addition to easy, cost-effective operation, compact HP Designjet printers are designed to fit in a variety of locations, making them accessible to faculty and students alike. Help promote student knowledge through large-format academic prints and in-school communications.

# HP Designjet gets top grades at CSM College of Art and Design

## Making art with HP is easy and true to students' imaginations

HP and Central Saint Martins (CSM) College of Art and Design, in London, UK, joined forces to test the effectiveness of large-format printing in the school environment. By hosting a "design challenge," students at the College were able to show off their amazing work. At the same time, HP was able to demonstrate the value of large-format printing—and specifically HP Designjet Printers—as an educational tool that can serve the broader creative sector.

As part of the challenge, students were given in-school access to the entry-level HP Designjet T520 ePrinter and asked to develop large-scale, creative pieces of art. Final projects were put on display and winners of the challenge were selected. In truth, however, every student was a winner. In-school access to easy, large-format printing served to bolster student creativity all around. Instead of having to stop what they were doing in order to print at an off-campus copy shop, students were able to print on demand at school and make adjustments to their projects on the fly.

Similarly, the challenge proved that HP Designjet printing isn't merely a tool for architects and engineers. It can serve many industries—retail, fashion, and design—delivering easy, high-quality results to those who want to turn creative concepts into reality.

### Students speak up:

"Normally printers can be a barrier because they take so long to print... but this is really so fast."

"Once you get an idea, you can just print right away."

"It printed out exactly how it was on the screen."

"You don't need to be so clever to use the printer. It's so easy."
