

Improve patient care, help lower costs

HP Information Workflow Solutions for Healthcare

What if you could...

- Automate manual processes, eliminate errors, and reduce delays?
- Access patient charts, eliminate data duplication, and share content and status updates easily?
- Adhere to policies and procedures, and manage data and storage requirements?
- Enhance processes with fast, efficient technology, and deliver content in a variety of formats?

Achieve better outcomes

As your organization transitions from caring for patients on a case-by-case basis to a collaborative care environment, you aim to provide more holistic, proactive, and personalized services. Making such a change requires operating in a digital framework rather than relying on manual, paper-based systems.

Automated information workflows can significantly improve operational efficiencies, help address compliance regulations, and increase the quality of care—all while trimming costs. With deep experience in managed healthcare and healthcare services, HP has developed innovative solutions that help healthcare providers achieve these advantages.

Deliver more efficient care

- **HP Prescription Printing Solution:** Help meet government requirements and help reduce costs by printing tamper-resistant prescriptions on plain paper.
- **HP Access Control:** Increase security of printed Protected Health Information (PHI) and reduce printed pages with pull printing solutions.

- **HP Patient Identification Printing Solution:**

Increase patient safety with LaserJet- or OfficeJet-printed wristbands, which feature color codes and patient photos with two-dimensional and linear bar codes.

- **HP Distributed Workflow Solutions for Healthcare:**

Create a patient Longitudinal Medical Record (LMR) that's integrated into your Electronic Medical Record (EMR) system, using Enterprise Content Management (ECM) solutions that streamline and automate paper-based processes.

- **HP JetAdvantage Mobile Printing Solutions for Healthcare Providers:**

Enable staff to print wherever healthcare happens—right from their smartphone or tablet—to enhance mobile productivity and improve patient experience.¹

- **HP Patient Communications Solution:**

Help reduce hospital re-admissions, improve patient outcomes, and promote transitional care through tailored, multi-lingual, and multi-channel communications.

- **HP Managed Print Solutions (MPS):**

Optimize your print environment to increase clinical and back office productivity and help reduce costs.

HP Information Workflow Solutions speed in-patient admissions, cut costs

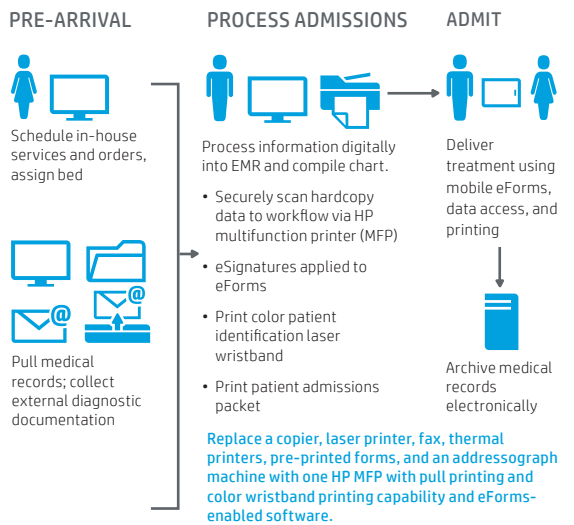

Before implementing HP healthcare solutions

Typical costs: ~\$68.50 per patient (~58% in-hospital, ~42% pre-admit and post-discharge)²

After deploying HP laser patient identification, security, and distributed workflow solutions

Typical costs: ~\$39.60 per patient (~62% in-hospital, ~38% pre-admit and post-discharge) = **\$28.90 estimated savings per patient²**

Why HP?

For more than 50 years, HP has been partnering with leading healthcare organizations, supplying the technical expertise and business savvy required to position these companies at the forefront of healthcare innovation. Today, industry analysts rank HP as a leading provider of information technology and services to the health and life sciences industry. In fact, nearly half of the top 10 healthcare equipment and services companies are HP Managed Print Services clients.³

HP's patient-centered healthcare solutions enable providers and empower patients with more powerful and intuitive solutions that deliver better care. We can help you improve care delivery, patient engagement, and population health management.

We will take the time to understand your specific needs and create a plan to help optimize your fleet, ensure data and document security, and manage your evolving workplace.
