

Simplify printing with HP connectivity solutions

Easily add new wireless or wired printing options to your HP printer

The challenge—secure mobile printing

Business moves likes never before with smartphones, tablets, and notebooks dominating the workplace. To keep up, you need solutions that make it easy to print from mobile devices to office printers—without adding to the stress or workload of your IT team.

The HP solution—print connectivity accessories

It's easy

Our range of connectivity solutions can help you get the most from your current print devices. Easy-to-install mobile printer accessories enable employees to print wirelessly from almost any mobile device to the HP printers and multifunction printers (MFPs) you already own.¹ HP's internal and external print servers make short work of large print jobs, so you can easily meet urgent, high-volume print needs on the fly.

It's secure

HP's built-in printer security features can protect your company network from outside threats. HP wireless print accessories create peer-to-peer connections that allow users to print without accessing the network. This way, data and business information is already protected—freeing up valuable resources and time for your IT team.

With HP, printing has never been easier or helped companies be more secure.

Plug-and-play wireless printing

HP 1200w Mobile Print Accessory

Easily add wireless direct printing² and touch-to-print technology to your HP printer or MFP, using the HP 1200w Mobile Print Accessory—designed to connect externally to a USB port on supported HP devices.

- Easy wireless printing—Simplify wireless printing for everyone in your office using a direct wireless connection.
- One-touch convenience—Enable smartphone and tablet users to print with just a touch.
- Safe and secure—Safeguard your business information with a peer-to-peer connection and 128-bit encryption.

Turn your HP printer into a wireless printer

HP Jetdirect 2800w Accessory

Equip your HP printer or MFP with the latest in wireless print technologies, using the HP Jetdirect 2800w Accessory—designed to install in the Hardware Integration Pocket (HIP) of supported HP devices.

- Easy mobility—Allow employees to select an HP Jetdirect-enabled printer, and then print directly from a smartphone or tablet.
- Wireless security—Rely on wireless direct and touch-to-print technologies to simplify and help secure your print environment.
- Simple management—Easily manage the HP Jetdirect 2800w across your fleet of HP devices using HP fleet management tools.

HP Jetdirect wireless print servers

Enjoy the benefits of wireless printing alongside the increased output and security of networked printing, using HP Jetdirect wireless print servers. Both internal (extended input/output (EIO)) and external (USB) wireless print servers are available.

- Versatile placement—Locate printers or MFPs wherever users need them, no network cable required.
- Seamless printing—Enjoy fast performance by sending print jobs over a secure wireless local area network (WLAN) connection.
- Robust security—Maintain security on protected wireless networks using fast, secure authentication and encryption.

Fast performance, reliable networking, increased security

HP Jetdirect internal print servers

Turn your business into a printing powerhouse with HP Jetdirect internal print servers—which plug into the EIO slot on supported HP printers or MFPs.

- Rapid printing—Print at high speeds by connecting shared office printers and MFPs over a gigabit network.
- Network-level security—Strengthen network security with encrypted configuration methods and features like HP Instant-on Security.
- Centralized management—Keep track of devices and easily manage your fleet with HP fleet management tools.

HP Jetdirect external print servers

Connect parallel or USB printers to your corporate Ethernet network, using HP Jetdirect external print servers.

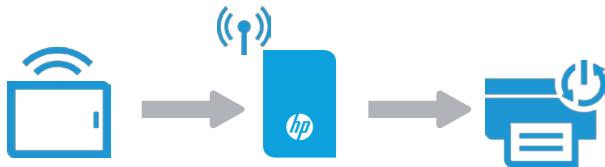

- Powerful performance—Enjoy network-level performance and security on devices that are incompatible with internal print servers.

HP mobile print technologies

Easy, fast printing from smartphones, tablets, and laptops using the HP 1200w Mobile Print Accessory or HP Jetdirect 2800w Accessory

Wireless direct printing

Simply connect your mobile device to a printer or MFP in the same way you connect to a secure WiFi network.

Mobile device connects to HP accessory, then sends print job

HP accessory receives job via wireless direct signal

HP accessory sends job to printer via USB

Touch-to-print

Walk up and print by touching your mobile device to the HP accessory. Touch-to-print technology creates a simple, secure one-on-one connection.

NFC-enabled mobile device

Touch mobile device to HP accessory to send NFC print job

HP accessory sends job to printer via USB

Find the right connectivity for your device

hp.com/go/businessmobileprinting

¹ Local printing requires mobile device and printer to be on the same wireless network or have a direct wireless connection. Wireless performance is dependent on physical environment and distance from access point. Wireless operations are compatible with 2.4 GHz operations only. Remote printing requires an Internet connection to an HP web-connected printer. App or software and HP ePrint account registration may also be required. Wireless broadband use requires separately purchased service contract for mobile devices. Check with a service provider for coverage and availability in your area. See hp.com/go/mobileprinting for more details.

² Mobile device must be wireless-enabled. Printer must be HP ePrint-enabled. Feature may require driver or apps, available for download at hp.com/go/eprintcenter.
