

HP Latex Mobile

Your printer in your pocket.¹

HP Latex Mobile¹ marks a new era of smart printers. This app enables you to receive helpful consumables alerts while also remotely monitoring your printer and job status. It also compiles metrics² related to ink and media usage and productivity that you can view from your tablet. Print with greater confidence, especially as you no longer have to worry about the status of print jobs while you're away from the printer.

¹ Only HP Latex 300 and 3000 series printers are supported. HP Latex Mobile is compatible with Android™ 4.1.2 or later and iOS 7 or later, and requires the printer and the smart phone or tablet to be connected to the Internet.

² Metrics are available using tablet devices only, not smartphones.

Rely on alerts to inform you when attention is needed

No more wondering what's going on with your printer while you're away:

- Alerts inform you about supplies, the substrate path, and situations when the printer is not ready
- Return to your printer and take action once you've been alerted

Know the status of your printer while you're away from it

HP Latex Mobile app offers insight into printer activity and ink and media usage:

- Follow printer activity remotely and gain an awareness of your printer at all times
- Stay abreast of ink levels and the amount of media remaining to avoid surprises and respond accordingly
- Use your tablet to view metrics.³ Email that information to your PC for more details on ink and media usage as well as productivity per printer or job. Use it to improve planning and operations.

Remotely keep tabs on print jobs

HP Latex Mobile app enables you to monitor job completion and job history:

- Track print jobs through to completion⁴
- Monitor jobs printed via job history

Available at:

³ Metrics are available using tablet devices only, not smartphones.

⁴ Printer updates occur roughly every five minutes during the printing process and every several hours when the printer is idle. Under certain circumstances, printer updates may be delayed—when system errors occur, for certain substrate jams, in the case of a power outage—in which case the app dashboard display shows the last known printer status.
