

HP Z620 Xeon E5 Family Processor

This is a secondary processor offering for the HP Z620 Workstation. The Intel® Xeon® processor E5 family delivers the best combination of performance, built-in capabilities, and cost-effectiveness to make data centers more flexible and efficient.

- From virtualization and cloud computing solutions to design automation or real-time financial transactions, you'll be delighted by better than ever performance no matter what tasks you face.
- When ordering two processors, the second processor must be the same as the first.
- Intel processor numbers are not a measurement of higher performance. Processor numbers differentiate features within each processor family, not across different processor families. See: http://www.intel.com/products/processor_number/ for details.
- Z620 processor kits come fully assembled and include the processor, heat sink, and the 2nd CPU & 4 memory slots. Memory DIMMs must be purchased separately.
