

HP Digital Sender

The HP Digital Sender Flow 8500 fn1 Document Capture Workstation is a high-speed, high-performance scanner you can share with your team. It makes it easy to collaborate because everyone uses a single device to scan directly to a shared network folder or printer, as well as email, Microsoft SharePoint, or USB drive.

Our networked scanner—the HP Digital Sender Flow 8500 fn1—keeps a fast pace while boosting team productivity:

- **No production bottlenecks.** Streamline your workflow by scanning up to 60 pages or 120 images per minute.
- **No waiting around for OCR (optical character recognition) to finish.** Simply put up to 100 pages in the ADF (automatic document feeder), hit the scan button, and remove your document. The scan processes in the background, so the next person can start their scan job without waiting for your job to finish.
- **No need to reenter scan settings each time.** Instead, select a predefined Quickset from the large HP Easy Select colour control panel.
- **No need to worry about missed pages.** Thanks to HP EveryPage¹ technology with ultra-reliable scanning and large instant-preview screen, you can verify every page.

Manage and control your entire fleet of HP scanners and MFPs with market-leading management and security solutions from HP:

- Use HP Web Jetadmin to manage and monitor your scanning devices, and HP FutureSmart technology to keep your fleet up-to-date for optimal performance.
- Know your sensitive data is secure on the encrypted HP High-Performance Secure Hard Disk—standard on the HP Digital Sender.
- Create and share sensitive business information securely using encrypted, password-protected PDFs.

¹ EveryPage is scanning technology from HP that more reliably separates, detects, feeds, and scans pages through the scanner.

HP ScanJet document scanners

Every scanner in our award-winning ScanJet portfolio helps you manage documents and improve workflow in your business. Whether you have a small business desktop or are part of a global enterprise network, we have a document scanner for you that's easy to use and manage.

HP ScanJet document scanners let you:

- **Connect to a variety of document management solutions.** HP ScanJet document scanners support popular third-party solutions such as Kofax and Laserfiche, and incorporate the TWAIN and ISIS standards.
- **Improve productivity and business processes.** Digitally automate business processes like banking applications, government forms, and real estate documents with an HP solution.
- **Save time.** HP ScanJet document scanners include high-capacity ADFs that are ideal for high-volume departments handling large jobs every day.
- **Be precise.** What good is fast scanning if you miss a page? HP EveryPage¹ technology gives you confidence that every document is properly scanned every time. And it handles documents of almost any type, including folded correspondence, stacks of mixed sizes, and business cards.
- **Get versatile.** HP ScanJet document scanners are packed with flexible features that let you do things like scan both sides, remove blank pages, use OCR, and send to several destinations at once.
- **Be economical.** We design our HP ScanJet document scanners for high usage and a long life span. They are even more efficient and durable with simple routine maintenance such as cleaning and replacing ADF rollers. And, since the entire product line is ENERGY STAR[®] certified, they consume less energy.
- **Get the quality you need and expect.** HP ScanJet document scanners include features that make your scans look great. Pages can be automatically sized, rotated, and straightened to look the way you want with the click of a button.
- **Work smarter.** No need to spend extra time arranging your originals before scanning. Let the software automatically rotate upside-down pages, straighten crooked pages, and maintain original page sizes—so a check is check size and a letter page is letter size.

Technology for better business outcomes
