

# HP ZBook Mobile Workstations Preferred Offerings

As a workstation customer, we know that you often need your product delivered quickly. That is why we have created the Preferred Offering program for the new HP ZBook Mobile Workstations. The Preferred Offering program aims to ensure high availability and short turn-around times on your orders.

The Preferred Offering program uses configurations that represent the mainstream components that make up a large percentage of shipments. Put simply, our most popular systems will be stocked with a buffer to assure the delivery of those systems to you in a timely manner. In fact, 90% of orders using the Preferred Offering program selections are filled in 6 days. And with roughly 40 percent of our mobile workstation parts on the Preferred Offering list, you have several options to choose from to build a system that fits your needs.

The following AVs are part of the Preferred Offering program selection:

<sup>1</sup> Multi-Core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing system required. Performance will vary depending on your hardware and software configurations. Intel's numbering is not a measure-ment of higher performance.

<sup>2</sup> Maximum memory capacities assume Windows 64-bit operating systems or Linux. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.

<sup>3</sup> GB = 1 billion bytes, TB = 1 trillion bytes. Actual formatted capacity is less. Up to 30GB of system disk is reserved for system recovery software (for Windows 8).

<sup>4</sup> DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided – Version 1.0 media. Double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players.
