

HP Smart Zero Core Technology

The smarter zero client.

Configure it and forget it. It's that easy with the smarter HP Zero Client experience provided by HP Smart Zero Core technology. Everyone wins with an easy-to-navigate ecosystem for end users and simple setup and maintenance for IT that doesn't require specialized administrative support.

Seriously simple

Cut out complexities with an HP Smart Zero Client solution that provides a clean, streamlined end user experience and can be easily customized to fit your needs.

Free your IT

Reduce hassle for your IT team with quick and easy setup, support, and client administration, plus limited configuration requirements and low-touch management.

Always adaptable

Switch up your virtualized environment without new requirements or installations, and maintain connection flexibility across cloud- and web-based applications, compatible browsers, and top VDI environments like Citrix®, VMware®, and Microsoft® RDP.

More control means smarter security

Control your data and your end user experience with minimal maintenance, configurations, and complexities. Keep your data more secure with a locked-file system.

Log in, boot up, and go

Treat your end users to a quick, simple login without an extensive interface or extra device training. Plus, faster boot up means they can get right to work.

Management made easy

Use HP Device Manager or HP Smart Client Services, included at no extra cost, for quick deployment across install bases, automatic updates, and remote access and management.

Super-charged data delivery

Improve wired and Wi-Fi network performance and the end user experience with HP Velocity software, which comes standard at no extra cost and optimizes network traffic for remote desktops and streaming of remote applications.

HP Thin Client family friendly

Get the performance and flexibility you need without sacrificing the simplified experience you want thanks to compatibility with a wide variety of HP Thin Clients.

The HP ThinPro advantage

Enjoy the freedom to adapt your business. Change to HP ThinPro for more OS capabilities, flexibility, and simultaneous connections, plus higher user customization and the ability to run concurrent virtual sessions. Best of all, no training required!

Take advantage of beautiful graphics

Deliver breakthrough video playback, graphics rendering, and performance of cloud content with built-in HP True Graphics, optimized for Citrix® and VMware Blast and designed to support dual 4K.

Customize control

Tailor user controls like toolbar location and access, browser permissions, auto-start capabilities, and launch delays to fit your needs.
