

HP Deployment Services: Install and User Settings Service

HP PC Services

Service benefits

- Installation of PCs that are IT and user ready
- Standard installation worldwide
- Easy to order

Service overview

With HP Install and User Settings Service, HP provides basic installation of your new device and more. HP will configure device security settings, connect and authenticate the PC to the network, and provide asset tracking and reporting. This service is part of HP Deployment Services, which focus on the distribution, delivery, installation, and decommissioning of HP assets. These services are designed to help reduce the amount of time IT teams spend on rollout and refresh projects.

Specifications

HP Install and User Settings Service

HP Install and User Settings Service provides all the services included in HP Installation Service plus customer security settings, connecting and authenticating the PC to the network, and asset tracking and reporting. The service does not include additional installation of software, data transfer from the old PC to the new PC, or data backup.

HP Installation and User Settings Service includes the following:

- **Customer contact:** HP or its authorized service provider will contact the Customer to make an appointment. HP will contact the person listed on the Customer order and schedule an appointment with one person per site. Unless otherwise requested and/or scheduled, the standard practice is to start all installation services within one week after delivery of the hardware at the Customer's dock or door. Delivery completion times are subject to HP and its authorized service providers' availability. HP Installation and User Settings Service will attempt completion in a single visit.
- **Desk-side delivery:** HP will pick up products from the Customer's receiving or staging area and deliver them to the specified Customer location (e.g., an end user's cubicle, office, lab, or room). The Customer's receiving or staging area must be in the same building as the cubicle, office, lab, or room where the products will be delivered.
- **Unpacking:** HP will inventory the shipment against the packing list and unpack all delivered products. HP will also remove packaging materials to on-premise Customer-designated locations, which must be in the same building as the cubicle, office, lab, or room where the products will be delivered.
- **Setup:** HP will place the PC in the Customer's designated location and physically connect peripherals, network cables, and power cords. Peripherals are limited to a monitor, docking station, keyboard, and mouse. The service does not include wall mounting.
- **Power-on/boot-up:** HP will turn on the PC and execute initialization procedures with the installed image.
- **Security settings:** HP will configure the basic parameters (BIOS password, computer name, administrator name, administrator password, user account/name, and user password).
- **Network connection and authentication:** HP will physically connect the PC to the Customer's network and join the domain. This assumes that the network is already set up, configured, and operational.

- Asset tracking and reporting: HP will report the PC serial number and, if attached to the PC, the PC asset tag number by location (e.g., cubicle or room number) on a Microsoft® Excel spreadsheet.
- HP or its authorized service provider will then obtain signoff for the Certificate of Acceptance/Project Completion form.
- HP or its authorized service provider will not postpone an installation invoice based upon execution of the Certificate of Acceptance/Project Completion form.

Customer responsibilities

Site and product access

The Customer must ensure access to the building, floor, individual cubicles, offices, labs, and rooms where the service will be delivered on the date and time that the delivery is scheduled. Further, the Customer will provide working space and facilities within a reasonable distance of the products, as well as access to and use of information, Customer resources, and facilities, as is reasonably determined necessary by HP, to provide the deployment service for the products and to allow the HP service agent to help with the installation of the new units.

Customer resources include a site representative and contact to identify the cubicles, offices, labs, and rooms where the installations are to take place.

Cleared space

The desk or tabletop location where the new PC will be installed must be unencumbered and clear of any old, existing equipment. As necessary, the Customer will clear the space where the new PC is to be installed or order HP Decommission Services if the Customer requires HP to clear the space. While the old equipment (PC, docking station, monitor, keyboard, and mouse) must be cleared from the desktop or tabletop where the new equipment is to be set up and installed, it must be left in the cubicle, office, lab, or room if the Customer has ordered HP On-site Image Installation Service.

Appointment booking

Hardware and service orders will be placed per Customer site. It is the buyer's responsibility to provide the Customer site contact name, email, and phone number as part of the hardware service order process. HP's authorized service provider will schedule the appointment with the provided site contact and clarify the required service details. The Customer contact will either possess native language (site specific) skills (written and spoken) or be able to speak, read, and write English.

Project management

Overall project management will be provided by the Customer or ordered as a separate managed service from HP or a third party. HP or its authorized service provider will schedule an appointment with one person per site. It will be the responsibility of the Customer to contact or inform its end users. The Customer-designated project manager will ensure that end users or other designated representatives are available and present for any services involving custom settings.

It is the Customer's responsibility to provide a detailed installation/deinstallation plan (building, floor, pillar, desk, user, new device model, etc.) to the HP authorized service provider to enable desk-side delivery. Additional parameters such as BIOS password, computer name, domain name, administrator name, administrator password, user account/name, and user password are required for security settings, network connections, and authentication and imaging services.

If the Customer's project management or deployment coordination is performed in non-English speaking countries, the Customer's contact will either possess native language (site specific) skills (written and spoken) or be able to speak, read, and write English.

Accessory compatibility

If the Customer is requesting that existing legacy accessories, such as a monitor, docking station, keyboard, and mouse, be connected to a newly ordered PC (desktop, notebook, thin client, or workstation), then the Customer is responsible for and must ensure that the existing accessories are compatible with the new PC. The HP Install and User Setting Service does not include any logical configuration of the peripheral at the operating system level, including monitor or mouse settings.

Network readiness

HP Install and User Settings Service requires the Customer to ensure that the LAN and WAN networks in its premises are ready and operational prior to starting the installation services. The HP network connection service in the Install and User Settings Service does not imply that this service extends to setting up or configuring the network. If an HP provided service is required to set up and configure the network, then a separate Statement of Work (SOW) is required for these services.

Further, if remote connectivity is required to perform the installation, then it is the Customer's responsibility to establish such connection capability prior to the commencement of installation services.

Cabling preparations

The Customer will ensure that the power and network cabling at the designated desk is complete before the start of installation services.

Product collection point

The Customer will ensure that all products to be installed are in a centralized collection point and that the distances between the centralized collection point and the designated cubicles, offices, labs, and rooms where the installations are to take place are at an acceptable distance. The Customer's centralized collection point must be in the same building as the cubicle, office, lab, or room where the products will be delivered.

The centralized collection point can be the building lobby or loading dock (door or dock) where the products were delivered by the logistics carrier. If the Customer wants the centralized collection point to be someplace else and wants HP to place the products in a centralized collection location other than the lobby or loading dock (door or dock), then the Customer must order the Value-added Logistics Service for Inside Delivery, which is a separate standalone service.

Site access

Access to the collection point must be clear of obstacles (e.g., restricted access, locked doors, etc.). It is the Customer's responsibility to provide special equipment such as forklifts and stair walkers, as well as their respective operators. If elevators are present, the Customer will help with elevator access for the movement of units across different floors.

The Customer must inform HP or its authorized service provider about required security clearance or passports to access military or public areas, laboratories, and so on.

Licenses

The Customer must provide licensed software with valid keys, where applicable, for HP to perform the installations. It is not HP's responsibility to verify licensing or the validity of software provided by the Customer for any installations.

HP Install and User Settings Service requires that the Customer's security and licensing policies allow third-party agents (in this case, HP and/or its partners) to have access to the passwords, devices, software, and networks necessary to complete the selected service and associated tasks.

Bootable image

The PCs to be installed will either have a bootable image already installed on them, or the Customer must have ordered the On-site Image Installation Service.

General responsibilities

Data backup

It is the Customer's responsibility to back up all Customer files, data, or programs prior to the commencement of any Deployment Services and to be able to reconstruct lost or altered Customer files, data, or programs. The Customer must maintain a separate backup system or procedure.

Hazardous environment

The Customer must notify HP if it's discovered that the working area allocated to HP poses a potential health or safety hazard to HP or service agent employees. HP may postpone Deployment Services until the Customer remedies such hazards.

Authorized representative

The Customer must have a representative present when HP service engineers are providing Deployment Services at the Customer's site.

The Customer's representative will either possess native language (site specific) skills (written and spoken) or be able to speak, read, and write English.

Specific requirements

The Customer must fulfill the above responsibilities for the specific services acquired.

General provisions

Operational hours

HP Deployment Services are performed during local standard HP business hours on normal business days, excluding local HP public holidays.

Subcontracting

HP may (a) subcontract the performance of any of its obligations (in whole or in part) to a third party, including HP authorized service providers, or (b) assign or transfer this Service Agreement to another HP entity at any time subject to written notice.

Delivery location

Installations occur at ship-to locations only.

Supported hardware

HP desktops, notebooks, thin clients, workstations, retail point-of-sale devices, and tablets are supported with this service.

Geographic coverage

These services may not be available in every location. Please contact your local HP sales representative for country-specific coverage and limitations.

Ordering information

Deployment Services may be ordered only if a new PC (desktop, notebook, thin client, or workstation) is purchased. Deployment Services are limited to a PC, monitor, docking station, keyboard, and mouse. The service only needs to be ordered for the PC and includes the connection of these accessories. The service is generally limited to PCs and the accessories ordered with services; however, HP will connect the aforementioned existing accessories to a newly ordered PC pursuant to the Customer responsibilities noted in this document.

HP Deployment Services will be limited to a maximum of 1,000 units per order and are subject to the following installation capacities:

- Site orders with fewer than 10 units must have all units installed at the same time.
- Site orders with more than 10 units require that a minimum of 10 units be installed per day.
- Overall service is intended to be complete eight weeks after delivery of the hardware. Orders for more than 1,000 units can be fulfilled through HP GetMore Services.
