

# Stop security breaches in their tracks

Help protect information and virtually eliminate compliance concerns with HP Secure Content Management & Monitoring

## What if you could...

- Reduce the costs of document security while fully complying with all industry and government regulations?
- Increase response times when investigating security leaks by quickly generating a detailed audit trail?
- Automatically monitor your printing and imaging environment for sensitive keywords and phrases?
- Protect confidential documents through convenient authentication methods at your printing and imaging devices?
- Go beyond a traditional printer-log search using advanced analytics that connect to all your business logs?

## Challenge

Every time employees use a network device to print, scan, copy, or fax documents, your organization runs the risk of a damaging security breach. Not to mention associated fines for noncompliance with industry and government regulations that can run into the millions of dollars. To ensure complete control of all your content, you need a better way to identify, investigate, and halt document and information leaks before they hurt your organization—and your bottom line.

## Solution

Get document management and compliance peace of mind with HP Secure Content Management & Monitoring, a solution that includes both HP JetAdvantage Security and Workflow Solutions. Simultaneously monitor and audit almost every piece of information sent through your printers and multifunction devices. Quickly generate a detailed audit trail in the event of a security breach that reveals the who, what, when, and where of the leak—and shut it down fast. Combined with robust search and analytics capabilities that help prevent future breaches, HP Secure Content Management & Monitoring provides a better way to detect and deter classified leaks and keep your organization running smoothly.

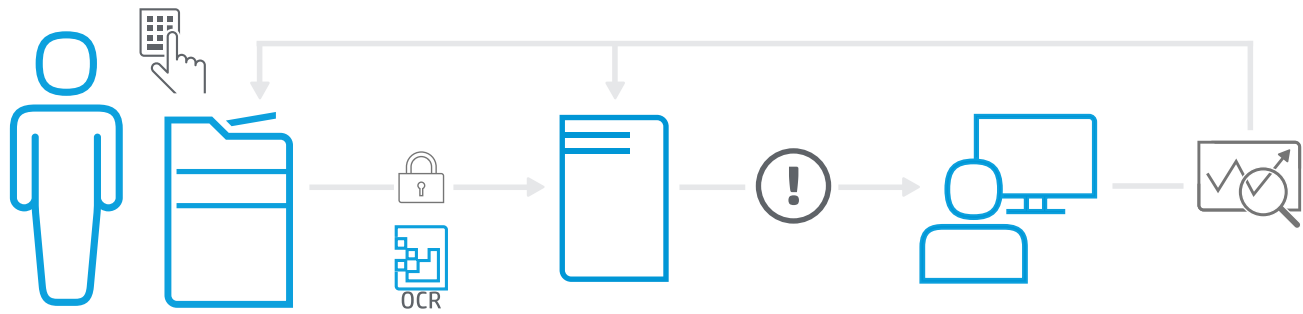

# 61%

of organizations reported at least a single print-related data breach in the past year.<sup>1</sup>

## Comply with the latest regulations—and save

- Reduce exposure to steep fines with an HP solution that's fully compliant with the latest industry and government regulations on document security, including HIPAA, SOX, FERC, NERC, and more.
- Help cut costs by automating the process of tracking security leaks. HP Secure Content Management & Monitoring provides a full audit trail within minutes—not days or weeks.

<sup>1</sup> Quocirca, "Managed Print Services Landscape, 2016," quocirca.com/content/managed-print-services-landscape-2016, July 2016.

User authenticates and initiates job, then print, scan, copy, and fax information is captured.

Information is archived and analyzed through document OCR and secure routing to create a complete audit trail.

IT monitors and manages for policy-based security compliance using robust search and analytics technologies, if a security breach occurs, IT is immediately alerted.

If the security breach is a high threat, user credentials may be disabled and security personnel notified. Otherwise, the easy-to-follow audit trail tracks the who, what, when, and where of the breach.

## Identify and prioritize security threats across IT

- Add powerful monitoring functions to your system with workflow and security solutions that provide advanced capture, archive, and auditing capabilities in one place.
- Collect information from all your printer and multifunction device logs—as well as other business information logs—for greater analysis and a deeper level of insight.
- Extract more meaning from your searches with conceptual search tools that identify the information that's most relevant to your security concerns.

## Manage classified documents with confidence

- Generate a comprehensive audit trail for every document that's printed, scanned, copied, or faxed. Quickly detect which information leaked, who's responsible, and when it happened.
- Monitor your document environment without attracting attention or disrupting workflow. HP Secure Content Management & Monitoring works entirely behind the scenes, keeping security tight and productivity high.

- Protect your devices and prevent unauthorized use with a variety of authentication options, including HP proximity card readers, alphanumeric personal identification codes or numbers (PIC, PIN), and smart cards.

## Close off threats in minutes

- Isolate security threats by quickly shutting down user credentials when a breach occurs. HP Secure Content Management & Monitoring immediately alerts your security team when an event is triggered, keeping users from jeopardizing additional information until the investigation is complete.
- Gain insight into potential breaches and act on them without delay with the power of HP analytics. The HP Capture and Route DLP Module analyzes and extracts meaning from virtually all forms of business data and information.

## Get started

Contact your local HP representative to:

- Set up a workshop to talk about your unique business needs.
- Create a plan to launch the best security solution for today and into the future.
- Identify the best practices and processes that meet your organization's full compliance needs.
