<sup>1</sup> Fastest based on internal HP testing and methodology compared to alternatives for large-format printing of technical documents, GIS maps, and point-of-sale (POS) posters under 200,000 € as of March, 2015. Production costs savings based on comparison to a setup consisting of one monochrome LED printer and one colour production printer, both under 150,000 €, as of April, 2015. Production costs consist of supplies and service costs, printer energy costs, and operator costs. For testing criteria, see <http://www.hp.com/go/pagewidexlclaims>.

<sup>2</sup> Based on internal HP testing on the HP PageWide XL 8000 Printer compared to using two different printers (one monochrome LED printer, one colour printer). For testing criteria, see <http://www.hp.com/go/pagewidexlclaims>.

<sup>3</sup> Using HP SmartStream software compared with using equivalent software programs. For testing criteria, see <http://www.hp.com/go/pagewidexlclaims>.

<sup>4</sup> The production stacker and online folder are optional accessories.

<sup>5</sup> For output produced with HP PageWide XL printers and LED printers from different manufacturers and that represent greater than 50% of the annual shipments of LED printers in North America as of 2014 according to IDC. For testing criteria, see <http://www.hp.com/go/pagewidexlclaims>.

<sup>6</sup> Compared to prints produced with HP 970/971/980 inks that are fade and moisture resistant per ISO 11798 Permanence and Durability Methods certification. For testing criteria, see <http://www.hp.com/go/pagewidexlclaims>.

<sup>7</sup> ISO/US technical and offset standards include American ANSI and Architectural page size standards, ISO A technical document standard, and ISO B offset page size standard.

<sup>8</sup> Based on supplies and service costs for comparable LED printers under 150,000 € for large-format printing of technical documents as of April, 2015 which represent more than 80% of the share of high-volume LED printers in the US and Europe in 2014 according to IDC. For testing criteria, see <http://www.hp.com/go/pagewidexlclaims>.

<sup>9</sup> Based on supplies and service costs for comparable colour printers capable of printing 4 A1 pages per minute or more and under 150,000 € for large-format printing of technical documents as of April, 2015 and representing more than 80% of the market in the US and Europe in 2014 according to IDC. For testing criteria, see <http://www.hp.com/go/pagewidexlclaims>.

<sup>10</sup> Conclusions based on internal HP testing for a specific use scenario. Comparable printers using LED technology based on LED printers capable of printing 18 to 22 A1 pages per minute and which represent more than 80% of the share of high-volume LED printers in the US and Europe according to IDC as of April, 2015. For testing criteria, see <http://www.hp.com/go/pagewidexlclaims>.
