

HP Remote ICC Profiling Service

For HP PageWide Web Presses

Best for

Publishing companies, transaction, direct mail, and print service providers.

Highlights

Cost-effectively achieve the best-possible colour performance for a given media.

Leverage HP colour consultancy expertise to offer your customers a higher standard of colour accuracy.

Optimise your colour performance with customised ICC profiles for your HP PageWide Web Press

Achieve the best possible colour performance on a given media with custom colour profiles. With colour profiles customised for a specific job on a specific media, you can offer your customer performance beyond the capabilities of standard colour (ICC) profiles and colour matching aligned with the ISA 12647 industry standard.

Key benefits

- Meet your customer's colour accuracy demands for a specific job with respect to the FOGRA standard
- Reduce the cost, time, and business risk typically associated with optimising setup to achieve high-quality colour output on a specific media type
- Reduce media and ink consumption by minimising pre-production print trial and error

Service description

Activities	Description
Initial analysis includes	HP will provide colour target files along with printing instructions. Once the files have been printed on your press, ship them to the HP Competency Center to be analysed by HP's colour experts.
Press setup includes	HP will build the custom ICC profile(s) and email it back to you, along with installation instructions. The next step, upon receipt of the ICC profiles from HP, is to install and test on your HP PageWide Web Press. If needed, an HP colour expert will fine tune the ICC profile(s) according to your feedback on the colour output.
Knowledge transfer includes	Sharing of HP best practices and experience with installation of ICC profiles and generation of colour setups.

Service scope

The service will be remotely performed by HP.
One HP PageWide Web Press and one job/paper combination are included per service unit.

Key deliverables

- A custom ICC profile for one media to optimise colour output to match offset standard ISO 12647
- Knowledge transfer on how custom ICC profiles are installed

Requirements

Colour profiling targets to be printed and shipped to the HP Expert Center.

A remote connection to the press.

Consumables for testing.

Press availability window to perform the service in standard business hours. Estimated time needed will be advised after the target file samples have been analysed.

Audience

HP PageWide Web Press customers who want to produce printed output with a high-quality ICC performance can most benefit from this service.

Media vendors can also benefit by having ICC profiles tailored for their products.
