

HP Indigo Digital Press WS6800

Level 1 Conversion Course

For operators previously certified on HP Indigo Digital Press WS6000 or WS6600, the Graphic Arts Training Services offer a L1 Conversion Course to WS6800 in a blended learning format.

Key Features

Course Title

HP Indigo Digital Press WS6800-
Level 1 Digital Press Operator Conversion Course

Course Length

3 hours self-study plus 3 hours webinar

Delivery Languages

English, French, Italian, German and Spanish

To Register

You can register to this course or ask for more information at

graphicartstrainingcenter@hp.com

This training does not include Option training such as ILP, Packer arm, or reinsertion

Course Objective

By the end of the training program HP Indigo operators will be able to:

- Identify the new parts and their functions in the HP Indigo WS6800 digital press
- Perform daily and periodic maintenance routine
- Understand how colour is controlled within the HP Indigo WS6800 digital press
- Successfully print on multiple substrates

Audience

- For those individuals who were previously certified on HP Indigo WS6600 or WS6000 digital offset printing presses who now move to WS6800
- For certified operators on WS6600 who install a Value Pack with the features of an WS6800 on their press

Prerequisite

- Candidates should hold a Level 1 certificate for WS6600 or WS6000 and they should have recent experience printing on that press

Benefits

Trained HP Indigo Press operators will positively influence press reliability in the following areas:

- Ensure machine stability and dependability by performing routine maintenance, on schedule and according to prescribed procedures
- Maximise productivity while minimising waste and maximising consumable life by monitoring the printing process, recognising output problems, and implementing the appropriate corrective actions
- Achieve optimum print quality by understanding the machines capabilities

MyRoom - The software package used for the webinar

Operators are already familiar with this tool as it is also used for Remote Support

Start

Register for the course by contacting the GraphicArtsTrainingCenter graphicartstrainingcenter@hp.com

The Graphic Arts Training Center will

- Verify that the operators were certified previously
- Send a MyRoom invite
- Send a number of documents for pre-work
- Check the Myroom set-up with the customer if needed

Course Structure

Step 1 - Self-learning

The Operators will be requested to review a number of documents prior to attending the webinar using MyRoom. This is mandatory as the webinar builds on previously acquired knowledge. Failure to do the pre-work is a reason to cancel the webinar.

Step 2 – Attend a webinar using MyRoom

The next step is to attend a webinar using MyRoom. The webinar, in turn, consists of 3 sections:

- Introduction
- Technical topics: RIO, Scaling, SPM, One Shot, CWS, Maintenance
- Assessment

Detailed Course Outline.
