

HP 3005 pr USB 3.0 Port Replicator

The HP 3005pr USB 3.0 Port Replicator is our ultimate platform-independent hot desking solution that gets you online, makes up to six of your everyday USB devices immediately available, and expands your productivity with connection to two external displays—all through one USB 3.0 cable.^{1,2,3}

HP notebooks and beyond

Great solution for multi-platform and evolving notebook environments.

Work smarter with dual external displays

DisplayPort and HDMI inputs help you expand your productivity with two external displays on top of your notebook screen.²

Customizing your desk is a snap

Select your most frequently-used peripherals, keep them on the desk, and connect immediately with one cable from your notebook to the port replicator.¹ Two USB 3.0 and four USB 2.0 ports connect to your trusted legacy devices and newest accessories. USB 3.0 offers transfer speeds that are faster than USB 2.0. USB 3.0 is backward-compatible with USB 2.0 so you can continue using your USB 2.0 devices. Gigabit Ethernet gets you high-speed network connectivity.³ Headphone and microphone inputs work with headset and microphone capabilities on the connected notebook (if available).

Simple setup

No optical drive required.
Flash memory software drivers for a user-friendly installation.

Enhanced security

Security Lock Slot allows you to tether the port replicator to a desk for enhanced security in a cubicle, hot-desking or multi-seat environment.

Flexible design

Use the same AC adapter as your HP notebook to minimize desktop clutter.
Note: Connected notebook is not charged by the port replicator

¹ Copyright-protected content (HDCP) will not be displayed on devices connected through the port replicator (such as external drives, display adapters, and monitors)

² Two external displays with 1920 x 1200 resolution each are available when connected through a USB 3.0 connection from the notebook to the port replicator. Up to a 2560 x 1600 resolution is available on a single external display connected through a USB 3.0 connection from the notebook to the port replicator, however when a 2560 x 1600 resolution display is connected to the port replicator, the unused port will be disabled. 1920 x 1200 resolution is available on a single external display when connected through a USB 2.0 connection from the notebook to the port replicator

³ Internet connection required

Specifications

HP 3005pr USB 3.0 Port Replicator

Part number	F3S42AA
Dimensions	10.34 x 7.83 x 0.80 in (262.7 x 177.8 x 2.1 mm)
(H x W x D)	4.73 x 3.07 x .97 in (120.2 x 78 x 24.7 mm)
Weight	0.234 lb (106 g)
