

## Solution brief

# Transform the way you manage and share scanned information

## HP Scan Configuration Service

Industry workflow templates make it simple to route information where it's needed

### What if you could...

- Route scanned documents or digital files to the destinations that make sense for your industry?
- Save valuable IT time by having HP configure workflow templates that fit your industry?
- Define industry-specific workflow rules to ensure proper document routing and notification?
- Streamline workflows without adding additional infrastructure—using an embedded, server-less solution?

## The challenge

Today's businesses are dependent on a wide array of both electronic and paper-based document types. Converting paper-based and electronic documents into a variety of digital formats is commonplace—the challenge is in capturing and routing them quickly and selectively to their destination for easy access and compliance requirements.

## What is it?

HP Scan Configuration Service is an add-on service providing pre-configured workflow templates through HP Embedded Capture, an embedded scan-and-send solution.

Industry-specific menus and prompts make it simple to capture information in the required format and with the required metadata, and route it where it is needed.

**Convenience capture:** Turn your MFP/scanner into a digital on-ramp and connect your digital workflows to shorten your document processing time.

Based on predefined workflow rules, your documents are sent to multiple destinations with a press of a button.

Automate and shorten turnaround time to process documents needed for account opening, loan applications, patient admissions, etc. Become more competitive by improving the customer experience.

## Benefits

**Accessible:** Do more with your device using HP Embedded Capture and the HP Scan Configuration Service—no additional infrastructure needed.

**Industry specific:** Let HP create custom workflows specific to your business processes right at the device. And create rules to ensure proper document routing and notification.

**Affordable:** Embedded solution, server-less; installs quickly and requires little configuration time.

## Digitize/capture documents wherever they are based on **pre-configured industry templates by HP**

### Do more with your device

Get started using industry-specific templates to optimize how you process scanned and digital files—with the HP Scan Configuration Service.

The templates include menu options and prompts designed for your industry, so that you can route scanned files quickly and efficiently.

Save valuable IT time and resources by using this service. HP provides the templates and installation services you need to scan and distribute files in a way that makes sense for your business.

### Get started

Contact your local HP representative to get started. We have a team of industry solutions consultants who will assess the business processes specific to your industry to help determine your specific business needs.
