

Capture and control scan jobs from your mobile device

HP JetAdvantage Capture App

Jump-start business processes—send and capture scans directly from your smartphone or tablet

What if you could...

- Capture documents or images with a mobile device camera?
- Use a mobile device to initiate scans on HP scanners or MFPs?
- Easily discover and connect to available devices?
- Automate tasks with one-button shortcuts?
- Create custom workflows?

Quickly discover and scan

Businesses often share devices within work teams, and a scanner or MFP device may not be nearby. The HP JetAdvantage Capture App provides employees with a convenient and easy way to initiate scans, as well as capture and send scans, directly from their Android™ smartphone or tablet—versus their desktop.

What is it?

The HP JetAdvantage Capture App enables you to initiate scans from your mobile device.¹ Using this app, you can control scans on many HP MFPs and scanners directly from your smartphone or tablet.² You simply open the app on your mobile device, initiate the scan you need, and send it to a cloud folder, email, Dropbox, or image gallery.

You can also snap, store, and route digital files using your smartphone or tablet.

Benefits

Increase digital processes: Use the familiar interface of your smartphone or tablet to easily send files from your scanning devices, as well as convert paper-based information to digital form and send files to multiple destinations.¹

Accelerate workflow: Use your mobile device to quickly turn documents into digital files and add them to your workflow with one-button ease.¹

Minimise risk: Turn important documents, such as ID cards or claim forms, into electronic files while in the field to increase control and traceability of those files.

Reduce cost: Improve efficiency and help drive down costs. Capture and manage information in more flexible electronic formats that require less paper, mailing, or physical storage.

- Initiate Scan at scanner or MFP
- Capture scan through camera
- Select scanner or MFP
- Use auto-created replay
- Use preset destinations
- Save shortcuts

Home screen displays when you open the app

- Click “Scan” to initiate the scan on the selected MFP

Scan displays on the Pages screen

- Make desired edits
- Click + to add additional scans, or Click > to send

Send screen opens

- Select destination(s)
- Select output type
- Click > to send

Count on scans that come out looking great—directly from your camera
Get precise images and clear, readable text with features that autocorrect and enhance:

- Auto-rotation
- Auto-deskew
- Auto-contrast

Do more with your smart device

In addition to capturing documents or images with a mobile device camera, you can use your mobile device to initiate scans on select HP scanners and MFPs.¹ The app automatically discovers supported devices and displays them on your smartphone or tablet.² Just hit “Send” on your mobile device to route the scan to your preferred destination—without having to use your PC.

Automate frequent tasks

You can turn repetitive scan jobs into shortcuts and send files from your mobile device with just one touch.¹ Use the shortcut wizard to create customised scan settings, image-correction options, and routing destinations.

Digitise and store content

Scan documents directly to the cloud, email, or the image gallery on your mobile device.¹ And protect confidential information against theft or accidental loss. Convert paper documents into digital files for more secure routing and storage.

Lower paper storage costs

Help avoid the storage and mailing costs associated with paper documents. Simply capture and route digital files right from your mobile device.¹
