

One-stop IT management for Education

HP Touchpoint Manager for Education

Help boost student and teacher productivity by enabling schools to easily manage devices and their connected learning environments.

Education is transforming to take advantage of advances in technology. Students and teachers are connected in the classroom and beyond, enabling new teaching styles and learning experiences. The proliferation of devices and schools' increasing dependency on them can present challenges for educational institutions, especially when resources are limited.

HP Touchpoint Manager for Education gives schools a one-stop solution for managing devices regardless of brand or operating system¹—from a simple-to-use dashboard. There is no logging in and out of different applications, so you can solve problems quickly and easily.

Focused on the needs of education

HP Touchpoint Manager was developed specifically for organizations with limited IT. Its intuitive interface, default configurations, and security policy settings enable even the most inexperienced IT administrators to manage their environments with confidence. With HP Touchpoint Manager, you can manage your environment from a single interface that keeps pace with rapid changes in applications and operating systems—so you don't have to.

Quick to deploy, easy to use

You can be up and running within minutes. There is no lengthy deployment process and large numbers of devices can be enrolled simultaneously with a single PIN. And because it's cloud-based, you can access your device-management and support tools from virtually anywhere you have network access² to solve issues in real time. HP Touchpoint Manager gives school IT the ability to enforce security

policies across groups, remotely secure devices, and detect and respond to threats in the classroom and beyond—helping improve IT effectiveness and student and teacher productivity.

One solution, all devices

Manage different devices from different brands and operating systems all with the HP Touchpoint Manager app, and perform device maintenance tasks quickly and easily. IT administrators or their delegates can easily enroll iPhone and iPad devices, as well as other devices running on Microsoft® Windows, Windows 10 Mobile and Android.

Outstanding value and flexibility

Unlike point solutions, HP Touchpoint Manager covers it all so you can avoid the extra licensing expenses of multiple solutions. There are no deployment costs and there is no need for additional hardware. Special training or certifications are not required.

HP Touchpoint Manager—delivering value that matters to education

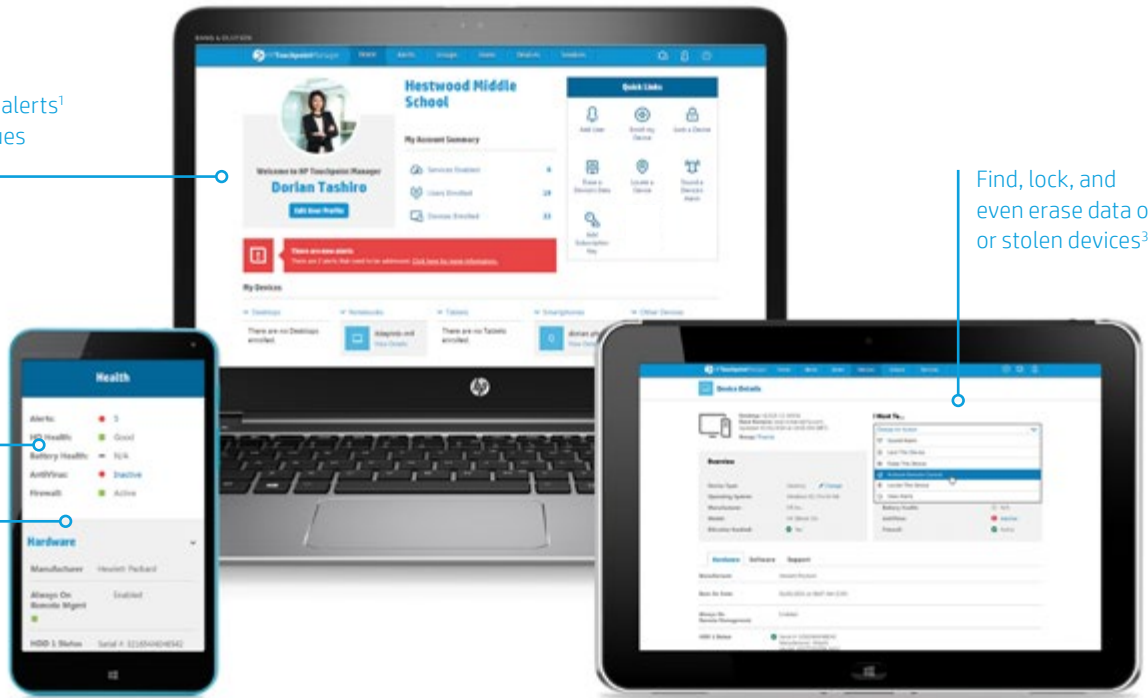

HP Touchpoint Manager for Education is your one-stop manageability solution to boost student and teacher productivity—today and into the future. With default security settings, it helps schools create a safe IT environment. A cloud-based app with simple, intuitive tools, HP Touchpoint Manager is designed to work for everyone, not just IT professionals.

Cross-platform support
Easily manage users and devices across common brands and operating systems, including full support for Windows 10.

Receive real-time status alerts¹ to help troubleshoot issues

Minimize security vulnerabilities by monitoring and deploying critical application patches

Track device inventory and monitor the health of components to optimize device lifecycle management⁴

Find, lock, and even erase data on lost or stolen devices^{3, 4}
