

HP School Pack 2.0 featuring HP Touchpoint Manager for Education Basic

One-stop IT management for Education

HP Touchpoint Manager¹ helps organizations boost IT effectiveness and employee productivity with a one-stop cloud-based solution for managing users and devices—regardless of brand or operating system.² Its intuitive interface, default configurations, proactive alerts, and security policy settings enable even the most inexperienced IT administrators to manage and secure their environments with confidence.

Help boost student and teacher productivity by enabling schools short on IT resources to easily manage and secure devices across multiple operating systems from a simple-to-use dashboard

Quick to deploy – affordable to use

You can be up and running with HP Touchpoint Manager within minutes. Because it's cloud-based, you can access your device-management and support tools from virtually anywhere you have Internet access to solve issues in real time – helping improve IT effectiveness and teacher and student productivity. There are no deployment costs, and additional hardware and special training are not required. With frequent service updates through the year, you get additional functionality at no additional cost.

Protect data and devices

HP Touchpoint Manager includes the ability to find and lock devices on a map and the ability to erase³ the data on a device if it has been lost or stolen. IT administrators can also easily set and apply security policies across groups of devices, taking advantage of default settings or customize the settings and policies as needed. Additionally, HP Touchpoint Manager can monitor and apply firewall and anti-virus policies and extend device

¹ HP Touchpoint Manager for Education includes one-year TouchPoint Manager Basic subscription. Purchase required after one year. Not available in all countries see www.hp.com/touchpoint for availability information. Subject to various environmental features including that the lost product be powered on and have Internet access. The service is not a guarantee.

² HP Touchpoint Manager requires purchase of a subscription and supports Android™, iOS and Windows 7 or higher operating systems and PCs, notebooks, tablets

³ Subject to various environmental features including that the lost product be powered on and have Internet access. The service is not a guarantee.

lifecycle by monitoring hard disk health, available hard disk space, and battery health on Windows devices.

One solution, all devices

Manage different devices from different brands and operating systems from a single dashboard. School IT administrators can use wizard-based tools to easily enroll devices running on Microsoft Windows, Android, and iOS operating systems. IT can easily view device and software inventory for enrolled devices. BYOD policies allow personal devices to be managed and secured while maintaining user privacy.
