Solution brief

Downtime reporting solutions ensure patient care continuity

HP

LRS Output Server solution for healthcare

Whether a network outage is planned or unplanned, LRS Output Server solutions help ensure optimum patient care in virtually any situation.

Business value of output management

LRS Output Server software promotes faster and better healthcare information delivery while helping you save money. Whether your clinical staff needs timely downtime reports in order to deliver quality care or you need to better control your print management costs, LRS has the solution for you.

The flexible, platform-independent LRS architecture provides a customizable central point of access to all information across the organization, both during downtime events and during normal operations.

The customizable LRS Output Server provides assured delivery of Medication Administration Records (MARs), Physician Rounding Reports, and other critical information—regardless of origin, destination, or Electronic Medical Record (EMR) vendor.

Assured delivery, uninterrupted workflow

Ensure business continuity
Downtime report delivery is complex and can require data decollation and delivery based on; patient location, time-sensitive generation, and security and tracking management of the most recent report(s). The LRS solution helps ensure business is uninterrupted during downtime situations.

Meet your unique needs
The flexible, highly customizable LRS solution architecture supports both centralized and decentralized approaches—helping you meet your unique physician and nursing requirements.
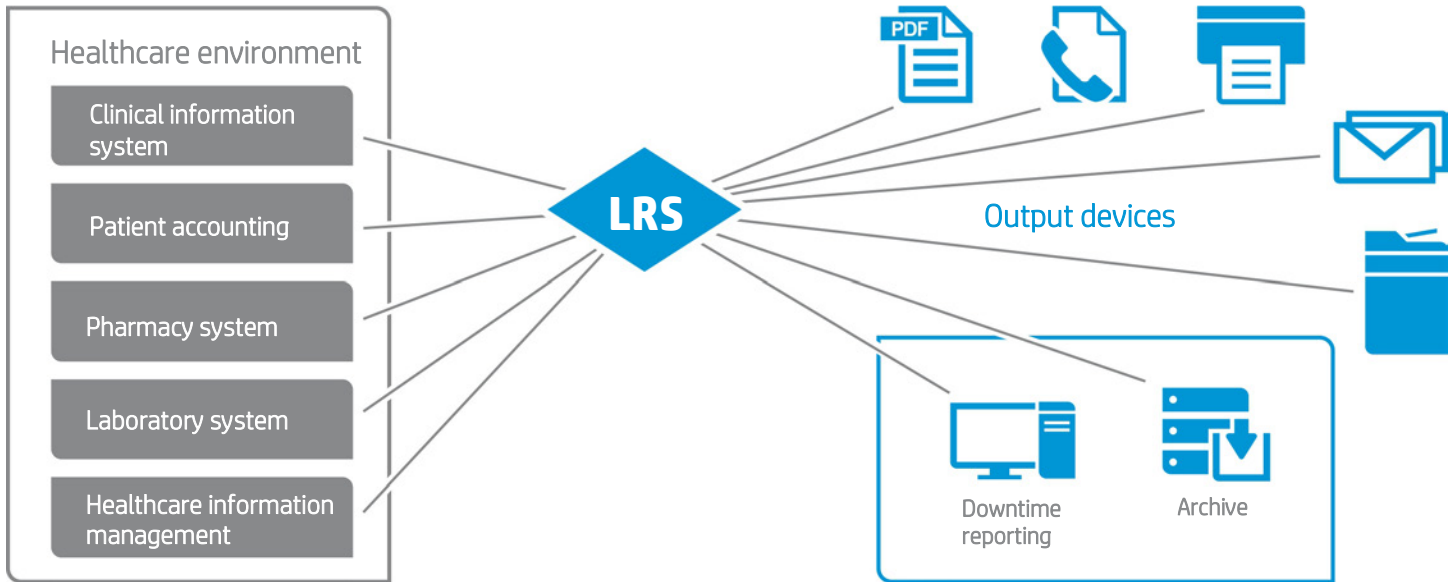

Receive all-the-time downtime support
Get access to documents during scheduled or unscheduled downtimes, including system testing, network outages, or loss of access to critical clinical applications.

Automate document management
Automatically purge reports based on your clinical, business, or legal requirements.

Centralize for simplicity
Combine various processes and applications into one simple-to-use system.

Average five-year 492% ROI with a 10-month break-even point

After interviewing a variety of LRS customers in the fall of 2015, IDC research analysts concluded "IDC projects that these LRS customers will achieve an average five-year return on investment (ROI) of 492% and will break even on their LRS EOM investment in 10 months…"[1]

LRS downtime reporting solution benefits

Reduce manual processes
Eliminate the need for manual printing, handling, separating, and distributing of paper reports during downtime occurrences.

Simplify document storage
Get simple and secure centralized report storage for online viewing and print options, similar to a real-time environment.

Easily transform and access documents
Convert reports and data to PDF and other standard end-user viewing formats for improved accessibility.

Conveniently audit, track and analyze reports
Administrators can easily see who accessed or printed which reports, when, where, and how often.

Protect your documents
Securely access PDF's that have been converted, password protected, and encrypted.

Drive intelligent document distribution
Combine data from one or more sources and provide assured report delivery to nursing stations or other points of care.
