HP PrintOS Print Beat

For HP Indigo Presses

Gain insights to continuously improve press performance

February 2017

Make day-to-day print operations more efficient, productive, and enjoyable with PrintOS Print Beat—a cloud-based print optimization solution that delivers historical and near real-time¹ data for better, faster decision-making and improved print operations.

Daily performance and high utilization

With HP PrintOS Print Beat you can now start making better, faster data-driven decisions with near real-time¹ and historical information, ubiquitous access to that data, and tailor-made recommendations for improvements based on your existing usage.² Use Print Beat with your HP Indigo Digital Presses to gain access to status updates virtually anytime, anywhere³—via email, web browser, or mobile device.

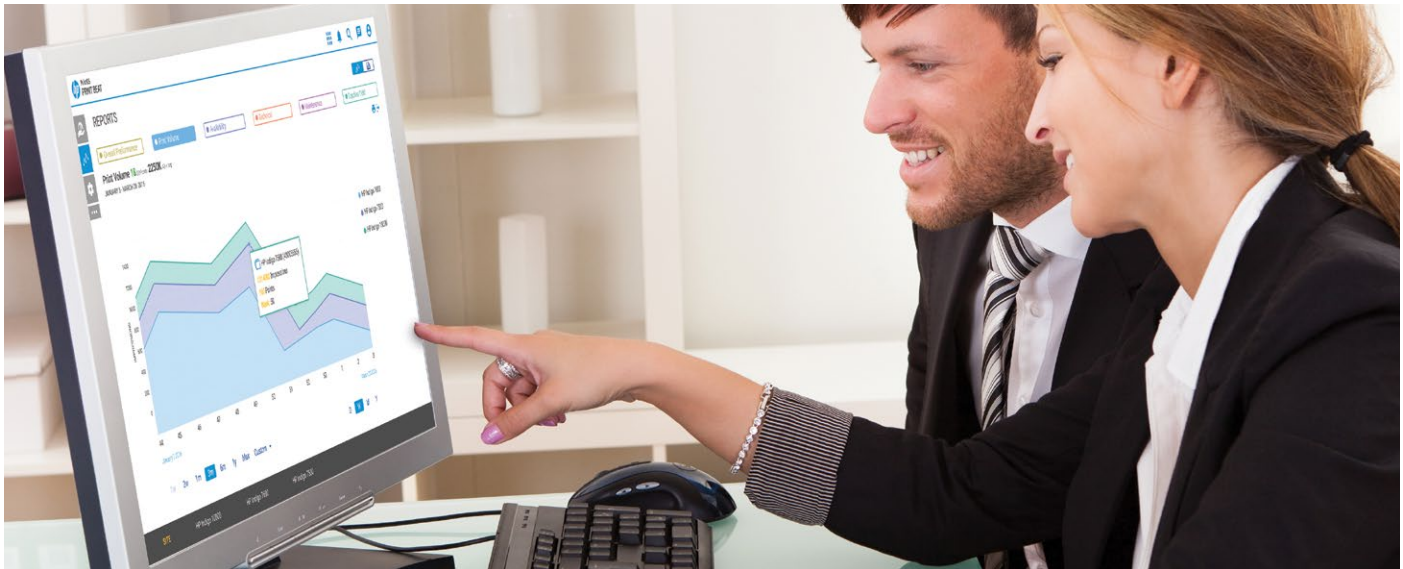

Track press and site performance

The HP Print Beat focuses on five key performance indicators (KPIs) that have a direct impact on press and site performance—print volume, availability, failures, restarts, and supplies lifespan. Detailed information on each of these KPIs provides in-depth visibility into production site operations—for one or multiple presses. Make informed decisions for improvements that increase efficiency and uptime—and ultimately, performance.

¹ PrintOS Print Beat near real-time view is currently available for HP Indigo users only.

² Tailor made recommendations based on existing usage are part of the Print Beat Personal Advisor, currently available for HP Indigo users only.

³ The HP PrintOS Mobile Application is compatible with Android™ 4.0 or later and iPhone mobile digital devices running iOS 8 or later, and requires the press/printer and the smart phone to be connected to the Internet.

Continuous operational excellence

Key performance indicators provide in-depth visibility into production site operations together with the Personal Advisor, enabling quick action and opportunity for improvements. The Personal Advisor provides tailored recommendations based on specific data received directly from your presses to increase uptime, improve print quality and ensure that your presses are well maintained for maximized performance and utilization.
