

Leverage the full power of mobile printing for business

HP JetAdvantage Connect

Seamlessly leverage existing IT network tools and policies to manage mobile printing.¹ Securely print from a variety of smartphones and tablets as easily as from a PC.

What if you could...

- Enable secure printing from mobile devices to company-networked printers?
- Leverage existing IT tools to manage mobile printing?
- Empower users to natively print from leading mobile devices just as easily as they do from a PC—no app needed?
- Allow users to print to a secure, encrypted pull-print queue from their mobile device, then retrieve print jobs when and where they need to?²

The challenge

In today's fast-paced, mobile business world, users need intuitive solutions that make printing efficient and reliable. In addition, IT departments are under pressure to streamline management of mobile printing processes, while also maintaining network security.

To help increase productivity while limiting security risks, companies need an easy way to enable and monitor mobile printing.

Enable IT to easily deploy mobile printing

Give smartphone and tablet users easy access to printing and maintain the control you need, with HP JetAdvantage Connect. This solution helps keep your fleet secure and reduces the work it takes to set up and manage mobile printing.

With HP JetAdvantage Connect, there's no need to duplicate print-management, policy-setting, or job-accounting tools. This seamless solution makes it easy to help protect data and track print job information based on settings and tools already in use in your print environment.

Reduce network traffic by rendering print jobs on mobile devices rather than print servers. This helps minimize the number of servers—and the bandwidth—needed to process print jobs.

Help save time and money—without sacrificing security—by utilizing your existing authentication tools.³ HP JetAdvantage Connect enables mobile users to easily connect and print through authorized network access points.

are interested in mobile printing, while only 23% are currently using mobile printing solutions⁴

Make mobile printing easy and intuitive

Deliver hassle-free mobile printing—there’s no need to open a separate app. HP JetAdvantage Connect allows users to print directly from core business applications, using the built-in print capabilities of their mobile operating systems.¹ The print experience is as smooth and easy as printing from a PC.

From their smartphone or tablet, users can quickly and easily discover, select, and send print jobs to printers on the company network. Apple® iPhone® and iPad® users can start printing right away, without installing any apps. For Android™ mobile device users, setup simply requires a one-time plug-in installation.¹

In addition, printing with HP JetAdvantage Connect provides the security features that IT departments require. Using industry-standard encryption protocols, it provides secure, end-to-end data protection.

Protect document confidentiality

Help users securely print from virtually anywhere, anytime. HP JetAdvantage Connect works with HP Access Control Secure Pull Print, to help make printing from mobile devices more secure.²

Through the native print applications on their mobile devices, users can send jobs to a secure, encrypted pull-print queue. Print jobs can then easily be retrieved at enabled devices using mobile release, PIN, or ID badge.² This helps keep sensitive documents secure and prevents unclaimed print jobs from sitting in the output tray.

Why buy HP?

HP has the expertise to identify and integrate innovative solutions—for companies of any size—to help meet their complex business needs. As a global technology leader, HP offers financial stability and scale to improve IT value, enabling customers in major industries to become more cost-effective, efficient, secure, and sustainable.

¹ HP JetAdvantage Connect works with leading mobile devices. A one-time plug-in must be installed for devices running Android™ operating system. For details and a list of supported operating systems, see hp.com/go/JetAdvantageConnect.

² HP Access Control must be purchased separately.

³ For a list of supported authentication tools, see hp.com/go/JetAdvantageConnect.
