

# HP Device as a Service (DaaS)

---

Smart, simplified computing solutions for today's world

Make your company more efficient, improve the employee experience, and free up IT resources to drive growth.

# Multiplatform environments can be challenging

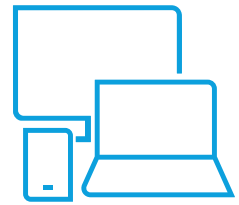

The addition of personal devices entering the workplace has challenged ITDMs in maintaining a secure and manageable IT environment. Multiple operating systems functioning on different types of devices opened up new endpoints for security breaches and made it more difficult to accurately assess the status of the IT environment. HP DaaS simplifies these challenges by managing a diverse assortment of desktops, workstations, and mobile devices so your business can operate to its full potential without the worry of unsecure endpoints and unmanaged devices.

## Introducing HP DaaS

Boost employee productivity and IT efficiency with world-class computing solutions from HP DaaS. Get everything you need and nothing you don't, from hardware and accessories to lifecycle services and support, with one contract and a fixed price per device.

# The right devices for the job

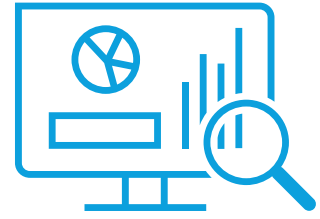

Impress the entire organization with devices hand-selected for the way they work—regardless of OS—with a choice of the latest PCs, notebooks, mobile and specialized devices. With HP DaaS, your device and accessory mix can be tailored to the unique needs of each team member.

Our available plans include global support, accidental damage protection, and next-business-day repair or replacement services, so employees can work worry-free wherever they go.

# Management with insight

---

HP DaaS plans include real-time analytics, insights, and proactive management to help you optimize assets and resources, so you can focus on projects that move your business forward.<sup>1</sup>

Take advantage of HP's multi-type, multi-OS device management capabilities, beginning with unique analytics captured across all of your HP DaaS devices.<sup>2</sup> Implement proactive corrective actions before your operations are ever affected. HP Service Agents monitor and diagnose the health of your fleet in real time and can apply the necessary fixes for a reliable, consistent computing experience. Tailor your plans with additional lifecycle services, from assessment and deployment to end of use.

---

Actionable reports for more proactive management:

Battery life

Hard drive

CPU utilization

Security compliance

Software usage

# Flexibility for your business

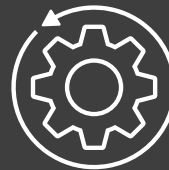

Don't pay for more than you use. Adjust your plan and flex down your fleet to meet your changing workforce or workload.<sup>3</sup> Add lifecycle services and refresh devices as needed with the simplicity of a single contract and price per device.

## With HP DaaS, you get:

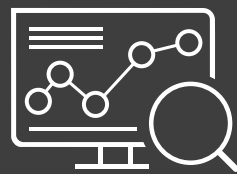

Unified multi-type,  
multi-OS management

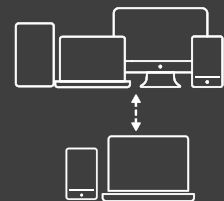

Technical support  
and next-day  
break/fix service

Lifecycle  
management on  
a global scale

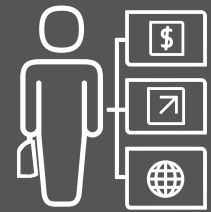

Unique analytics and  
proactive management  
capabilities

Flexible plans  
with a one-stop  
price-per-device model

# One-stop solution

HP DaaS delivers world-class devices and accessories that are right for the job, combined with one-stop hardware support, service, and fleet management that can lighten the load on IT—all with a simplified, predictable pricing model.

## END-TO-END LIFECYCLE SERVICES

Our full portfolio of service options covers every phase of the device lifecycle—from start to finish—for HP devices and other brands. Our expert consultants will help you choose a program to optimize your technology investment.

### DISPOSE

Keep your technology fresh by letting HP securely and responsibly manage hardware that's at the end of its lifecycle.

### MAINTAIN

Relieve your IT staff of maintenance hassles by letting HP handle onsite service, accidental damage protection, and more.<sup>4</sup>

### OPTIMIZE

Get the most out of your IT environment through helpdesk services, priority support, and staff augmentation.

### DISCOVER AND DESIGN

Create your ideal tech environment with our assessment, design, and planning services.

### CONFIGURE

Have your custom images and settings installed at our facility or take more control with HP's new Dynamic Configuration Service.

### DEPLOY

Hit the ground running by letting HP handle everything from logistics to installation to data migration.
