

Smoothly transition to Windows 10 with HP Services

HP Configuration and Deployment

Save time and optimize your resources with expert consulting, design, configuration and deployment services from HP. Count on us to deliver fast, accurate and globally standardized solutions.

Benefits include:

- HP supports you end to end: from assessment to implementation
- Services are tailored to your needs, thanks to a modular approach
- Take advantage of our global reach and stay focused on your core business

Rolling out a brand-new OS can be daunting. HP understands that, and provides an array of services to help you **enjoy all the advantages** Windows 10 has to offer.

Readiness HP Assessment and Strategy Service for Windows 10

Update to Windows 10 the easy way, with a customized strategy for seamless transition without disrupting your business. We'll collect the required information about your hardware, applications, and network, as well as key policy information around device and

system management and identity and access management. Then, we will produce a detailed assessment and strategy report to help you decide toward the next steps on your migration.

Preparation HP Application Transformation Services

Ensure application compatibility with Windows 10. HP will collect and analyze your Windows and web applications to determine whether they will run successfully on Windows 10 and IE11. We'll then manage the design and implementation of any remediation required for applications that might fail.

HP Image Design & Build Services

Stay focused on your core priorities by letting HP design and build Windows 10 images for your new or existing PC fleet.

HP will design your image according to your requirements. After your validation, we will test your image and make it available to the factory, or load it on to your existing PC fleet.

Implementation

HP Image Load Service

Have your image loaded onto new HP PCs during the manufacturing process

After your new Win10 image is validated by you, we can load it on all your new HP PCs.

You can also enhance your PCs with all other configuration services such as, asset tagging, labeling, BIOS settings, and more.

HP Remote /Onsite OS Migration Service for Windows 10

Achieve a trouble free migration of your existing PC fleet.

HP offers onsite and/or remote migration of your existing PC fleet, depending on your requirements.

HP PC Deployment Project Management Service

Provides co-ordination and project management through the entire deployment project.

As part of the PC deployment process, end-to-end project coordination is essential to providing effective hardware installation or migration. With this service, an HP project manager will work with your project manager to establish a structured deployment schedule that reduces disruption to end users.

Ready, set, go with Windows 10 + HP Configuration and Deployment Services.

Put HP to work for your business today for the best Windows 10 experience. We can help you manage your migration with ease, and help your business make the most of the new security, productivity, and manageability features from both Microsoft and HP.
