

Brief

Get a helping hand with PC deployment

PC Deployment Project Management Services

Make your PC deployment a success with customised project management carried out by a team of experts

As part of this service, the HP project management team will:

- Gather your requirements
- Scope the project
- Validate your site
- Oversee deployment
- Coordinate the decommissioning of your old equipment

Easy PC deployment

Getting a fleet of new PCs is a daunting task for most businesses. Now you can make sure your specific needs are met in the most efficient way possible with a little help from our experts. With PC Deployment Project Management Services, you'll experience a successful, seamless PC deployment by a team of qualified project managers who will use the latest project management tools to customise and complete a plan for your business.

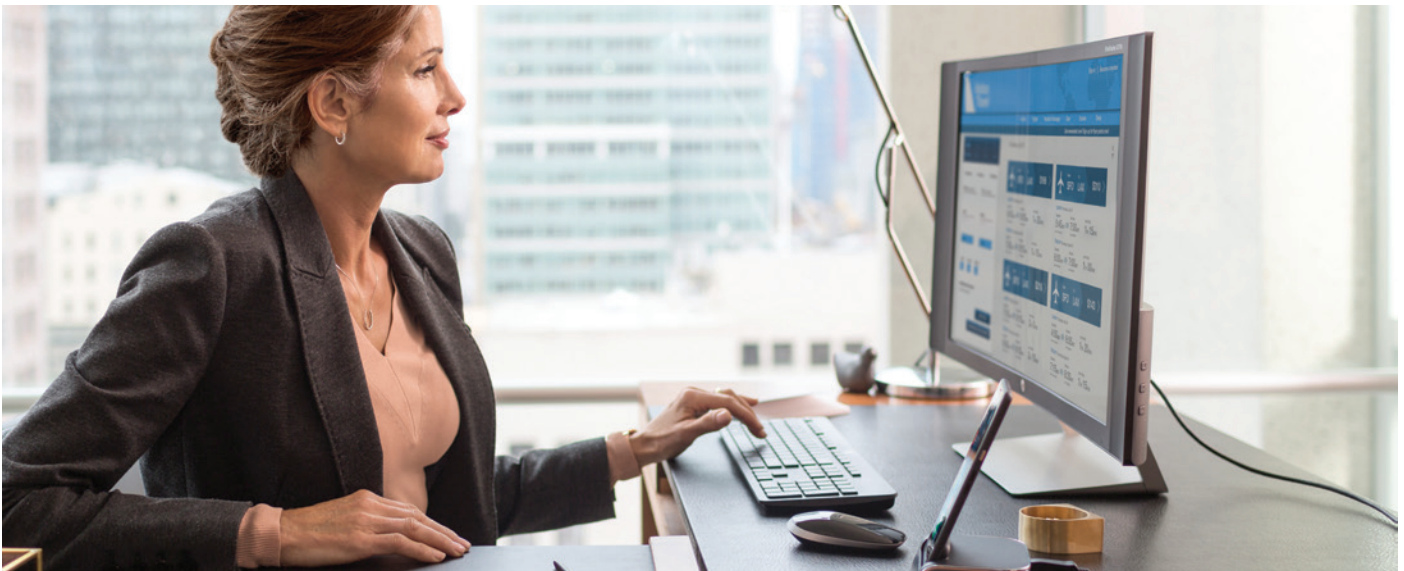

With minimal interruption, we'll handle it all—from scoping the project, to overseeing deployment, and even coordinating the decommissioning of your old equipment.

Pre-deployment

Rest easy knowing that your HP project manager fully understands your installation and requirement needs after using state-of-the-art tools to conduct an environmental assessment, providing you with:

- An evaluation of how prepared your business is for deployment and potential migration
- Details on which methodology, processes, and tools are needed to manage your deployment so the user experience is the same worldwide
- Project scoping, including hardware configuration or offsite staging requirements
- Validation that the power, network connectivity, workspace, and other applicable factors are suitable for deployment
- A detailed implementation plan, clearly stating what needs to be done to achieve the smoothest possible deployment

Deployment

Once your implementation plan is created, it's time to deploy. What does this require of you? Nothing. Sit back and enjoy knowing that your deployment will go off without a hitch while our specially trained workforce monitors everything. As all of this is happening, you will have live access to data so you can follow the progress of your deployment.
