

HP One Package workflow suite

The digital corrugated workflow ecosystem for converters seeking a smooth transition into digital corrugated production.

HP One Package workflow suite offers software and solutions from HP and partners to help converters maximize the flexibility of digital production.

With HP One Package workflow ecosystem converters can streamline submission and preparation of orders, and take advantage of an array of digital value-added possibilities. One Package's integrated production management and automation software also enhances operational performance and optimizes the supply chain.

Boost productivity and maximize flexibility with the industry's first digital corrugated workflow ecosystem.

Integrate digital production with your current environment

- Integrate HP PageWide Presses and solutions to enhance existing corrugated production and business workflows
- Works together with industry leading partner solutions – selected by HP
- Integrate through protocols, APIs, and consulting services

Prepare digital jobs with best-in-class tools and expertise

- “Select and go” with prepress solutions and services from HP and partners
- Amaze brands with color management tools and services for meeting brand color standards
- Benefit from HP's experience in digital migration with best practices and deployment program

Add digital value with proven solutions and services

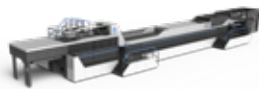

- Deliver brand content with smart use of versioned and variable imagery, color and data for high-value print campaigns
- Embed serialized marks and codes for brand protection, supply chain efficiency, track & trace, and customer engagement

Harness the full power of digital print flexibility

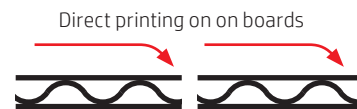

- Reach more end users with order access from HP qualified Web2package partners
- Enjoy expanded ecosystems that connect MIS, printers, corrugators, and converters using PrintOS-enabled automation techniques
- Improve customer experience for brands offering quick turn-around of orders, creative marketing concepts, and new applications

HP PageWide C500 Press

Post-Print
(direct to corrugate)
Printing directly on **pre-cut corrugated boards**

HP PageWide T1170S/T1190S Series

Pre-Print
Offline printing roll of paper to be used as a **top liner** in the corrugation process

Creation & submission

HP SmartStream Designer for Illustrator Software that allows creative artwork with variable design elements to be designed using the familiar Adobe Illustrator. HP SmartStream Mosaic is included making unique customized imagery.

HP SmartStream VDP Studio (best for high volume pre-print) Bundling SmartStream Designer, Mosaic, and Composer applications for high volume variability. SmartStream Composer accelerates the composition of variable data based on templates created with HP SmartStream Designer. The user may choose a tower or rack mount server to run Composer. Designer runs on either Adobe Illustrator or Adobe InDesign.

HP Link Technology Starter Package (for pre-print) Includes a one-year subscription to the HP Link service, provides a set of serialized marks suitable for creating print output to demonstrate the Link ID and mark capabilities, and staff training to understand and demonstrate them.

HP PrintOS Box (for post-print) Manage files captured from various sources, facilitate communication with print buyers and easily submit jobs to production.

PXi Digital PXI Digital develops digital packaging solutions (BoxItNow®) for visualizing and quickly creating paperboard package designs with graphics and logos or full panel artwork.

ESKO Esko is a global leader in packaging design workflow management, file creation and prepress automation solutions that deliver a streamlined gateway between prepress and press room.

MIS, scheduling & planning

Kiwiplan Kiwiplan provides powerful software solutions to streamline order management, automate plant scheduling, increase visibility and maximize production efficiency for corrugated manufacturers worldwide.

WITRON WITRON is a leading software supplier for the corrugated industry, offering an integrated application covering sales, planning, manufacturing, inventory management and distribution.

Print preparation

HP SmartStream HCP44 Packaging Color A bundled package providing the tools needed for a complete color design environment. Configured to help the user get started quickly and easily by including the tools they need, help with installation and getting started, plus training to use the tools that will deliver professional results on the HP PageWide Web Press. It includes soft and hardcopy proofing capability.

ColorGATE ColorGATE delivers software and color services to simplify color management, spot color replacement, ink reduction, and proofing, providing consistent and reproducible color fidelity

HP Production Prime Print Server for post-print High-performance print servers – HP Production Prime Print Server, for the HP PageWide C500 Press, features a high-power RIP for demanding post-print production. HP Production Elite Print Server, for the HP PageWide T400S and T1100 Series, for demanding pre-print production.

ESKO Esko is a global leader in packaging design workflow management, file creation and prepress automation solutions that deliver a streamlined gateway between prepress and press room.

HP Production Print Servers

HP One Package Elite software (for pre-print) Software extensions to HP PrintOS Site Flow that add valuable capabilities specific to pre-print packaging applications. These extensions help simplify and automate the operation of the Page Wide Web Press in a preprint production environment.

HP PrintOS SiteFlow Manages high volumes of short-run and personalized jobs end-to-end, from submission to shipment.

Et Erhardt+Leimer Erhardt + Leimer specializes in system integration for the corrugated industry, providing maximum processing efficiency from digital pre-print.
