

Brief

HP LaserJet toner cartridge return and recycling just got easier

Return used Original HP LaserJet toner cartridges to HP authorized partner collection providers for recycling with HP Planet Partners.

The HP Planet Partners return and recycling program offers free and convenient recycling of HP toner cartridges. Since 1991, more than 260 million HP LaserJet toner cartridges have been returned and recycled worldwide. For more than 25 years, we've been making a difference—together.¹

All HP cartridges returned to HP Planet Partners go through a multiphase recycling process where materials are separated and refined for use as raw material in new Original HP cartridges and everyday products. Cartridges returned through the HP Planet Partners program are never refilled, resold or sent to a landfill.

Many Original HP cartridges have been engineered to use recycled plastic and still meet HP's demanding standards for quality and reliability. Since 2000, more than 177 million pounds of recycled plastic have been used in manufacturing new Original HP ink and toner cartridges, keeping 4,425 tractor-trailer loads of plastic from going to landfills.²

Program benefits

- Free and easy return and recycling solution for empty Original HP LaserJet toner cartridges—for customers who are not interested in participating in the HP PurchasEdge program
- Helps reduce your environmental impact

Qualified products

- Qualified cartridges:
 - Original HP LaserJet toner cartridges
