

HP JetAdvantage Secure Print

Your convenient, cost-effective, more secure way to print

What if you could...

- Easily set up and manage one pull printing solution for HP and non-HP devices?
- Avoid the complexity and resources needed for server-based software by deploying a Software as a Service (SaaS) solution?
- Store jobs securely on a user desktop and/or in the cloud?
- Release jobs from a mobile device?
- Add comprehensive analytics to optimise your printing fleet?

The challenge

Shared printing environments can create costly security risks for businesses. Sensitive documents left at the device may be seen or picked up by unauthorised users—a potential security breach. Abandoned or misplaced prints waste time, supplies, and paper.

And in a multivendor print environment, secure printing can be even more complicated because it requires deployment of multiple solutions from different manufacturers.

The solution

HP JetAdvantage Secure Print¹ is a cloud-based solution that increases security and control of your print environment by releasing documents only to authorised users. Print jobs are held in a protected queue until users are authenticated. Unprinted jobs are automatically deleted based on your company's expiration policy.

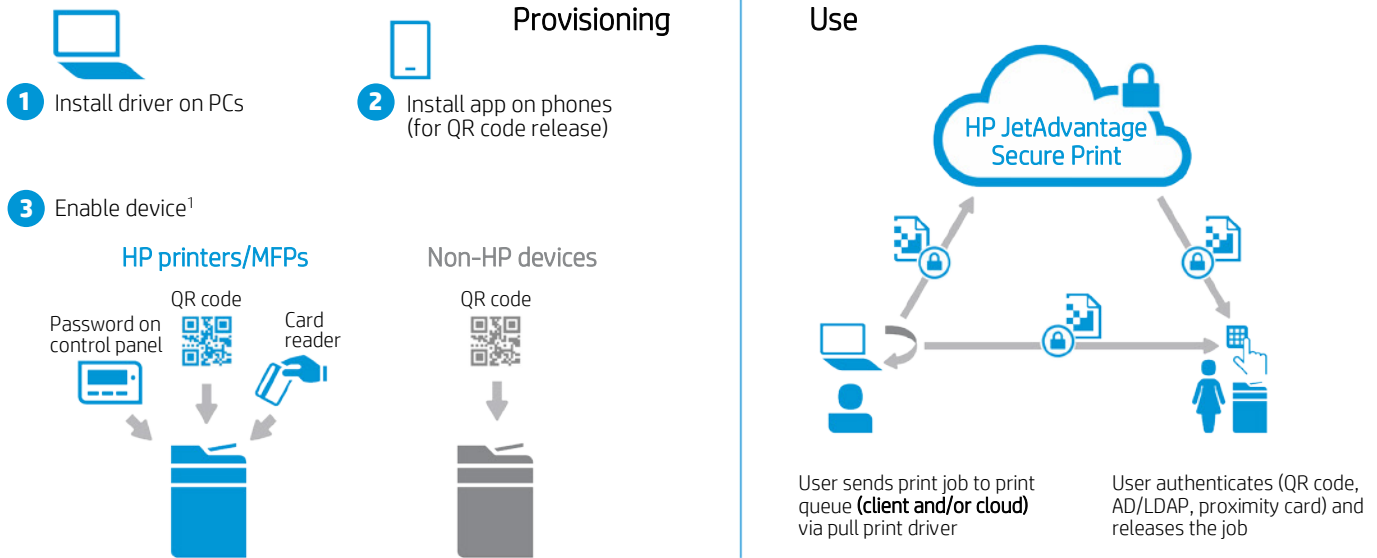

The solution helps cut costs by reducing waste and increasing productivity—without the need for additional onsite servers, storage, and software.¹ It's easy to set up and use, and it supports multivendor devices.

HP JetAdvantage Secure Print solution is available on the HP JetAdvantage On Demand web-based portal. From this centralised application management console, you can access and manage industry-leading applications and assign user access.²

Gain powerful insights

The HP JetAdvantage Secure Print solution integrates HP JetAdvantage Insights,³ a print analytics module, for an additional fee. This module allows you to accurately track and gather print data, analyse the results, and create reports. You gain powerful insights into your company's print environment through real-time reports that provide monthly print volume and costs, print device details, and more—to identify opportunities to help you reduce waste and costs.

How HP JetAdvantage Secure Print works¹

You can count on quick and intuitive installation, simple configuration, and automatic app updates. This easy-to-use solution is cloud-based, so you don't have to purchase and manage additional onsite servers and software.

HP JetAdvantage Secure Print provides three different options

¹ HP JetAdvantage Secure Print works with any network-connected printer or MFP. On-device authentication is available for many HP LaserJet, PageWide, and OfficeJet Pro devices. Some devices may require a firmware upgrade. Internet connection required for cloud storage and retrieval of print jobs. Print-job release from a mobile device requires a network connection and QR code. For more information, see hp.com/go/JetAdvantagesecureprint.

² Based on HP assessment of print manufacturers SaaS offerings as of September 1, 2016, no other print manufacturer offers a single cloud portal for user and app management.

³ HP JetAdvantage Insights is a web-based app that requires Internet access and must be purchased separately. For more information, see hp.com/go/jetadvantageinsights.
